Subject: Newland Sierra Project

Greetings, hope this finds you well. We would just like your office and Supervisor Jacobs to know that we don't support this project. The scope of it is too large and anything more than 500 homes is excessive. This county is quickly becoming consumed with Los Angeles type development and enough is enough. We don't need a mega development with only one real departure route (Interstate 15) to complicate an already congested corridor. There will be no public transportation of any significance there, and as is always the case, the developer will be long gone. The existing commercial space can't be readily built up to capacity so the argument that the commercial traffic will be worse is not a strong one. You could also consider some of the acreage for mitigation purposes on other developments in the future.

We are not anti-development but rather responsible development. You have stood on principal much more than the other supervisors and we hope you give careful consideration to this project.

Sincerely,

Brian and Monet Desrosiers
