Dear Ms. Smith,

Concerning the possible future community in the San Marcos area, my Father and I live at Champagne Village located directly next to the I-15 between Dear Springs and Gopher Canyon. My Father and I and a score of residents here are vehemently against this improvement due to the following reasons. Excessive traffic, we now have many traffic jams that keeps us from traveling comfortably to town. If the development were to be allowed in the event of a fire (which happens quite frequently) it would put us in serious danger. My Father and many other residents here are elderly and would require assistance in order to evacuate. In the case of my Father there is a myriad of medical equipment to load into the car. If we are late we will most likely die due to being trapped and in the least suffer from smoke inhalation. A new community would potentially put us at high risk.

If this community proceeds I will most likely take this up with the city and possibly sue.

Sincerely,

Marilyn Downs
