Subject: Newland Sierra project

Hi Ashley

As a long time resident and family business owner in the Buena Creek/Twin Oaks area I have several concerns about this yet again proposed project.

I'm worried about traffic impact and first responder access on an already overburdened "Rural Connector" that is Buena Creek and Deer Springs Rd. How do you see that problem being addressed?

I'm sure the County is aware of our fire danger in this mountainous area. How could they plan/protect from that?

I'm worried that Y'all are even considering this project again after denying the first run which was called the Merriam Mountain project. How can the BOS consider the Newland project since it clearly goes so hard against the General Plan for the area?

I've received a copy of the EIR for the project but at 8,000 pages I doubt I'll be able to read or understand most of it, but I'll try.

I'm also concerned about water supply. As it was explained to me we, the we would be required to cut our water usage by 30%. Could this information possibly be correct?

Thank you for your time.
