Re: Newland Sierra Development

Dear Ashley Smith @ San Diego County CA Gov.

Thank you for permitting us to write concerning our positive or negative support concerning the potential Newland Sierra Development in North San Diego County/Escondido, CA 92026. My comments will be only brief. My wife and I moved to Champagne Village (Condominium/Mobile Home Community) next door to the Lawrence Welk Resort because of my personal needs for a quiet slower pace of living yet still close and convenient to San Diego. In short I was severely injured about 10yrs. Ago at which time I broke my neck and my Thoracic Spine. I had several Major Surgeries which (one Saved my life and the others were to implant several devices from Rods to Plates and Screws in my Cervical and Thoracic Spine which simply kept me from being confined to a wheel chair for the remainder of my life. There are still many things which I have to deal with as a result of these injuries but one thing which many people (may not) realize is my inability to cope with stress. In these regards, I can't deal with stress from large numbers of people and/or automobiles, etc. My body has just been through to much and it can't handle stress. I simply break down and start shaking and can't stand up etc, etc. This is Not an email to attempt to seek attention or sympathy but just simply the Truth and if this New Development continues to go forth and is built so close to us, I fear all the results that it will place upon us/myself. I won't be able to cope with all the traffic, all the people and all other business development that it will bring in to this area as a result of this New Development.

I-195-1

I can continue to think of reasons for our/my personal reasons for being against this (potential) New Development, but I hope you will take my comments to heart along with All the other Residents here in Champagne Village who may also voice their opinions against building the Sierra Development. Most everyone who lives in Champagne Village moved here because it presented the atmosphere that not only my wife and I needed but also the atmosphere that they were looking for to live (most likely) for the remainder of their lives. I know how big Developments can entice to bring in New Money, etc, etc, but please Consider my comments and needs along with All others who may need the more quiet life style and community that Champagne Village has provided us over the years. That will all change if Sierra Development is permitted to go forward and Build.

Thank you again for these Considerations.

My Best Regards,

Jim R. Holmes
