Subject: Newland Sierra Project

We are against this project for many reasons.
The one foremost is that there is a General Plan to allow increased density housing so that the rural areas will be protected allowing wildlife to share our county and not be driven out!
Then there is the water limitation problems
The traffic on Deer Springs is already badly congested if there were to be a fire or other emergency there would be no way to evacuate...and do not try to convince me they will actually 'stay in place' if there is nuclear problems
Because the Merriam Mt project was rejected I can only assume that the reason this project has gotten this much consideration is because multiple persons must have been paid off.
