Dear Miss Smith,

I want to express my support of the Newland Sierra project.

We desperately need new homes built in San Diego County. I think this plan has considered many of North County's needs with the Master plan community model and it will help the economy by making sure employees have available housing.

The widening of Deer Springs Rd and redesigning the interchange at Deer Springs Rd. and Hwy 15 is long overdue. Newland Sierra will address this issue.

Newland Sierra is contributing millions of dollars to benefit our community because of this project but we won't see that if this project is turned down.

They have done a good job addressing water and energy conservation as well as managing the threats of wildfire.

There is so much more to say in support of this project. I truly hope this plan goes through.

Thank you very much.

Sincerely,

Linda Beels
