Subject: Newland Sierra

Dear Ms. Smith

I am writing to say that I am among those who feel that this project is detrimental for the area due to increased light pollution.

Having researched this area here in North County San Diego and the observatory at Palomar Mountain which relies on the night sky in this part of the county to maintain darkness at night.

Also the circadian rhythm, disrupted by artificial light has ill effects on human health, plants and animal life. Physiological changes that occur according to a circadian rhythm include [heart rate](#) and many cellular processes "including [oxidative stress](#), [cell metabolism](#), immune and inflammatory responses, [epigenetic](#) modification, [hypoxia/hyperoxia](#) response pathways, [endoplasmic reticular stress](#), [autophagy](#), and regulation of the [stem cell](#) environment.

Besides all of that..I do not want the zoning changed to accommodate more homes, One just needs to look a zillow or any MLS to see that there are thousands of homes for sale.

I wish I were more articulate in my expression of opposition. Just wanted to write to tell you that as a resident of Bonsall for the past 31 years, I moved here to live in a rural area, not dense pack housing.

Sincerely,
Debra Mirr
Bonsall, Ca.
