Subject: Reject Urbanize of the back country in Twin Oaks Valley

Over the years living and working in North County, I've tried to do what I can to prevent what I saw happen to the Los Angeles area 77 years ago. Yesterday I drove up Hiway 15 N to the Deer Springs intersection, got off and looked up at the huge pile of dirt and rocks I've passed by for years on the NW side. This is where they will build the one entrance/exit road to the proposed Newland Sierra Development--already a very busy intersection they expect will go from 2 lanes to 6. My years of observation of speedy Southern California brush fires is that hundreds of people will be trapped in this development.

FYI: I visited the fire station across the road on SW corner of Deer Springs and I15. Three young firefighters were there none had heard a word about this proposed development! There "boss" is no longer "on site" since reduced funding in last county election. I gave them the Newland Sierra Development brochure I had to show their boss when he shows up. They found it very interesting and couldn't believe there would only be one access road.

This is not a place for development!
