Subject: can't find Newland drilling, blasting,crushing schedule

Hi Ashley, I looked through the EIR and I am not seeing the blasting schedule, or drilling, before they blast and the crushing schedule.

How many days of each, etc. Merriam Mts. had 1600 days of drilling, blasting and rock crushing.

I looked in the EIR and then appendices on noise and air quality. May have missed it.

I find this EIR a lot harder to find things in than the old Merriam Mts. EIR. Seems to have less info also.

I only saw a small rock crushing chart that stated 255 days, as well as a drawing that showed the 2 possible locations of the rock crusher.

As a cancer survivor I am wanting to find this info. Thank you. Karen Binns
