Subject: Newland Sierra Project.
Importance: High

Hi Ashley:

There is no reason to reiterate all the problems created by this project so I'll just go on to my personal thoughts and that is: How soon we forget the fires of 2003 and 2007 which condemned The Merriam Mountain Project and then do we remember the drought of the last 6 years with this being the first year with no water shortages, this won't last the drought will continue in the years to come. How can 8,000 more people help this situation. How can 6,000 more cars leaving and coming home in the morning and afternoon help the traffic situation, already at 4 pm there is a line of cars on Deer Springs that goes from I 15 to well past Buena Creek. Letting a developer come into our community overbuild and take off with the cash and leave the problems for the rest of us to deal with is not a good plan.

If the growth plan for the county calls for 99 homes to be built at this site leave it that way lets not cause more problems for ourselves.

Sincerely Sanford V. Terrell.
