Ashley:

Hello. I am inquiring about the Newland Sierra Project. I am a property owner in the North Twin Oaks Valley area and I am interested in knowing what reasons the city would have that would cause it to NOT move forward with approving the project. What specific reasons would prevent this from happening?

I ask the question like that because it has been my experience that very, very rarely will homeowner dissatisfaction with planning for new developments ever stop new development and new revenue.

Thanks,
