<b>RE: NEWLAND SIERRA DRAFT EIR</b>
Dear Ms. Ashley Smith and Mr. Mark Slovick,  Thank you for the opportunity to respond to the Draft Environmental Impact Report for the Newland Sierra Development. After reviewing the document, I have a list of questions and concerns outlined below: How many fire stations will be built and would they be built prior to notice of completion? Will Deer Springs Rd. and Twin Oaks Valley Rd. be widened before any construction begins? Does Vallecitos Water District have the ability to purchase more water to accommodate this huge development? Will there be any accommodations or transition period for wildlife or any wildlife conservation (Coyote packs)? What is the area of circumference in miles that the blasting can be heard and felt in any degree? Will there be regular blasting dust cleaning of roads and structures affected? Will there be air quality testing due to the blasting debris in the air?  I am opposed to this project.  Sincerely, Wendy Chapman
