Subject: Newland Sierra letter

Dear Ashley Smith,

Please, please, please take time to read my letter and disperse it to others who need to know how retired people who live in this area really feel about this Newland Sierra project.

I have lived in Champagne Village, now for 10 years, and enjoy the rural feeling even with the freeway out in front of me. It sounds like the ocean and have learned to appreciate the white noise, but it was already in when I moved here. I love the hills around me and love feeling like I live in a small little town.

I-99-1

Can you even imagine all the extra cars on the freeway with this new project and I see no info on how they plan to improve the flow of this traffic. Even right now there is not good fire evacuation for those of us who live here, what will it be like for those families and us with so many people trying to get out of their homes.

We all have cut water to the bare min. and put in drought free plants. How can you ask people in that water district...I think it is Vallecitos Water District to conserve 36% water. How can you really ask people to do this to build more homes which will need more water??

I-99-2

There must be areas in San Diego County where building homes would not cause all these problems including tearing down a beautiful hill which enhances our view. of rural country, around us.

I-99-3

Tearing down this mountain, is going to cause many years of loud noise from all the rock crushing, earth moving and house building. We are talking years. We are talking years of dust in our air from the rocks being crushed and dirt being moved. We cannot breath this type of air and that white noise we hear, will now be deafening. I hope you understand how we as older people feel about our beautiful area we live in. Many of us only have 5-10 years to live and now we might not be able to live those years in our peaceful homes. Those with COP will probably have to move or die sooner because of the dust in our air.

I-99-4

Please tell, ask or whatever, these developers, "to go elsewhere"....This project does not give you any personal gain, but it gives so many of us who choose to live in a Rural area, great heartache and stress. We look forward to you relaying this message and standing by the people of North County.

I-99-5

I hope to hear back from you, and others, that this project was voted down and allow us to go back to our quite peaceful way of living. Again, I say, **Please, please, please.....**

Sincerely,

Beverly Amsbary Davenport
Resident of Champagne Village
