

I-122 Tony Eason (3)

I-122-1 The comment expresses concern over air quality impacts due to 10 years of construction and the significant unmitigable conclusion. The comment also states that the proposed mitigation measures are ludicrous. The comment also attaches an article from the Los Angeles Times and an abstract from the New England Journal of Medicine.

The comment addresses general subject areas, which received extensive analysis in the Draft EIR, specifically in Section 2.3 Air Quality. Also see **Topical Response AQ-1**. The comment does not raise any specific issue regarding that analysis and, therefore, no more specific response can be provided or is required. The County will include the comment as part of the Final EIR for review and consideration by the decision-makers prior to a final decision on the project.
