

### I-286 Monica Monter

**I-286-1** The comment questions whether the proposed project will result in a reduction in water supply to existing residents and if existing ratepayers are required to pay for upgrades. Please see **Topical Response UTL-1** and **UTL-2**.

The Draft EIR analyzes the project's potential impacts to Water Supply and Service in Section 2.14.1. The Draft EIR concludes the proposed project would result in a less than significant impact to water supply; however, the Draft EIR incorporates mitigation measures M-UTL-1 through M-UTL-4 to ensure that impacts remain less than significant.

With respect to the potential impact to ratepayers, this comment raises economic issues that do not appear to relate to any physical effect on the environment. No further response is required.
