

### I-78 Mary Clarke

- I-78-1** The comment is in regards to the San Marcos Highlands project and how a portion of that development is within the County. The comment also states that in any future Cumulative Impacts Analysis for the proposed project, the San Marcos Highlands project should not be included in the configuration approved by the San Marcos City Council. The County does not agree with this comment. The San Marcos Highlands Project was included in the DEIR's cumulative project's list (refer to cumulative project #103 in Table 1-10 of the DEIR) and cumulative impact analyses for the various impact areas of the DEIR. The Final EIR has been revised to clarify the San Marcos Highlands Project was included. No revisions to the cumulative impact analyses contained in the DEIR are required. No further response is required because the comment does not raise an environmental issue.
