DRAFT ENVIRONMENTAL IMPACT REPORT (EIR)
PUBLIC REVIEW MEETING COMMENT SHEET

This does not even touch upon the strain this development places on our limited water supply.

I am writing to voice my concern about this proposed project. While development is largely inevitable, I believe that this project should be in keeping with the community around it. I believe that this project should honor existing planning commission policies of dark sky maintenance, should not involve installation of sewer and natural gas lines, and should not install infrastructure to allow unmitigated development of this region. I believe that lot sizes should not be less than a half acre to an acre minimum and no development whatsoever should occur until SR94 (Campo Road) is improved to handle the roughly 12000 car trips added to the road. In addition, any attempt to "swap" for native preserve land is unacceptable. Our community feels betrayed by the development of the caverno - the last thing we would want is to have the 2.0 in our backyards. I currently work in Santee and see the negative impact that will have on CA 2 (67) / Most Blvd. We cannot allow such a thing to happen in Proctor Valley and CA 94.
