I. INTRODUCTION

On Tuesday, February 25, 2020, from 6:00 pm to 8:00 pm, the Casa de Oro Specific Plan team held a community visioning workshop in the cafeteria of the Spring Valley Academy. Numerous stakeholders from the community attended the workshop – thirty-four individuals signed in on the interest list, but several more were in attendance. The workshop opened with comments from Felix Aponte, San Diego County, and Bob Yaris, Casa de Oro Alliance, followed by a short overview presentation focused on the specific plan background, purpose, and overall schedule.

II. TREASURES, CHALLENGES & VISIONS EXERCISE

The Casa de Oro Specific Plan team led attendees through an interactive Post-it Note Visioning exercise. Using Post-it Notes, each attendee individually responded to a series of three big idea questions, as numbered below. Participants were asked to think about each question, record one answer or thought per Post-it Note, and place the Post-it Notes under one of three topics on the wall: treasures, challenges, or visions. The Casa de Oro Specific Plan team then grouped the ideas into key topics and themes, summarizing them for discussion with the larger group, and then provided the larger group with the opportunity to discuss, add more thoughts, and clarify some ideas. The topic areas that emerged for each topic are listed below. Asterisks indicate the key topics or themes that garnered the most Post-it Notes. A full inventory of each Post-it Note comment is provided in the Appendix of this report.

III. KEY THEME BREAKOUT SESSIONS

Based on the Post-it Note exercise findings and large group discussion, the participants selected a number of key themes as breakout session topics for them to take a “deeper dive.” The Casa de Oro Specific Plan team invited participants to join any of the six breakout sessions they wished and encouraged them to spread themselves around. During each session, the small groups used about thirty minutes to 1) discuss the topic more thoroughly; 2) record additional thoughts or details that explain the vision for the topic; 3) if applicable, articulate ideas (or issues) on the provided project area maps; and 4) identify any possible implementation tools, steps or resources needed. At the end of the breakout session work, a representative from each group presented their key findings. The topics and a summary of the small group discussions are provided below.
1. WALKABILITY / BIKEABILITY

Issues:

- No sidewalks
- Lots of curb-cut (driveway/road)
- Cars go too fast
- Conditions of the road/sidewalk
- Walls separate business areas & discourage walking
- No usable bike lane
- “Share the Lane” is needed

Solutions:

- Safe routes to schools
- Lighted/flashing crosswalk
- Speed limits that encourage walkability
- Street calming (traffic)
- Segregated bike lanes
- Remove walls (barriers) that keep residents from walking between business areas
- Better timed streetlights
- Repair roads and sidewalks
- Route to Murdoch school
- Appropriate speed limit to encourage walkability
- Getting to businesses on the same block

2. OPEN SPACE / TREES / ENVIRONMENT

Goal: Incorporate native low maintenance, low water, landscape throughout retail and residential areas for shade and aesthetic enjoyment.

- Green median with Jacaranda trees
- More trees for shading and green ground cover
- Pervious pavement – parking lots to reduce flooding
- Landscaping at commercial facilities
- Remove dilapidated buildings and parking lots; replace with park
- Using natural seasonal Sweetwater check for and/or walking and biking paths w/aesthetic natural landscape
- Green round-abouts at each end of Campo Rd
- Green access from Estrella Park to Campo Rd
- Make Campo Rd one-way
3. BUILDING ARCHITECTURE / FACADES

Goal: Adopt regulations to encourage improved aesthetics and create more coordinated architecture and building patterns/placement that encourage consumers to use local businesses and create a better sense of place as our community core.

- Kenwood to Sweetwater Springs = extent of areas
- Control traffic thru-trips
- More focus on local businesses - hard to see as back from road
- Slow traffic on Campo Rd (roundabouts, etc or other techniques)
- Santa Sophia landmark is hidden (on-street package, etc) - often the church forms center of town
- Buildings closer to street - business activity on street
- Split up parking - disburse buildings with parking
  - Offer on street parking; Parking behind businesses - use paseo/path to connect
- Allow for circulation connection between properties off Campo Road / reduce driveways on Campo Rd
- Build up, not out (3-4 stories)
  - Not big building masses/break them up
  - Address the street
- Lower floor retail w/residential overt (mixed use)
- Common-theme or limited themes or variety
- Limit back of buildings (activate sides, rears of buildings)
- Locate businesses on other than Campo Rd (re: dual frontage w/Kenora & San Juan)
- Promote larger scale redevelopment of older blocks w/small parcels (like Treebeard)
- Improve aesthetics
- Encourage business activity & consumer use
