# 1 Introduction

## 1.1 Purpose

The purpose of this annual progress report (APR) is to share with the Board of Supervisors (Board) and the residents of San Diego County (County) the status of implementing the County General Plan.

California Government Code Section 65400(a) requires that cities and counties “investigate and make recommendations to the legislative body regarding reasonable and practical means for implementing the general plan or elements of the general plan, so that it will serve as an effective guide for orderly growth and development, preservation and conservation of open-space land and natural resources, and the efficient expenditure of public funds relating to the subjects addressed in the general plan.”

The APR is required to be prepared and submitted to the Board, Governor’s Office of Planning and Research (OPR), and the California Department of Housing and Community Development by April 1st of each year. At a minimum, the APR should address:

- The status of the General Plan and efforts in its implementation;
- The County’s efforts in meeting its share of the regional housing needs;
- Local efforts to remove governmental constraints to the maintenance, improvement, and development of housing; and
- The degree to which the County’s approved General Plan complies with the State General Plan Guidelines and the date of last revision to the General Plan.

This report summarizes the planning activities for the unincorporated portions of the County from January 1 to December 31, 2022. In addition to the required information, Planning & Development Services (PDS) has included relevant ongoing and completed planning activities, programs, and permits.

## 1.2 Enterprise Collaboration

PDS has been supported by the following County entities in the production of this APR:

- Public Safety Group
  - Office of Emergency Services
  - San Diego County Fire Authority
- Health and Human Services Agency
  - Housing & Community Development Services
- Land Use and Environment Group
  - Agriculture, Weights and Measures
  - Department of Environmental Health
  - Department of Public Works
  - Department of Parks and Recreation
- Finance and General Government Group
  - Department of General Services

## 2 Planning and Development Activities

This section provides information on planning and development activities related to General Plan implementation. Information is presented in terms of plans, capital improvements, and projects.

### 2.1 Plans

#### 2.1.1 General Plan Amendments

Proposed projects that do not conform to the existing General Plan are able to request General Plan Amendments (GPAs) that propose to alter specific aspects of the General Plan without altering the overall intention of the plan. State law allows each of the mandatory elements of a General Plan to be amended up to four times during a calendar year. Subject to that limitation, an amendment may be made at any time and each amendment may include more than one change to the General Plan (Gov Code Section 65358(b)).

##### 2.1.1.1 Pinecrest Avenue GPA (GPA-21-004)

The Pinecrest Avenue General Plan Clean-Up corrected a mapping inconsistency affecting 7.56 acres of residential land in the North County Metropolitan Subregional Plan Area. This mapping inconsistency had prevented these parcels from being developed to the level intended in the County's General Plan, which directed the development of multi-family housing. The action resolved the mapping inconsistency by amending the General Plan Land Use Designation from Village Residential 15 (VR-15) to Village Residential 4.3 (VR-4.3), which allows for 4.3 dwellings per acre for a maximum of 32 single-family homes across the five parcels and change the Zoning to Single Family Residential (RS), noting that this option would not allow multi-family housing and would limit future development to single-family homes.

#### 2.1.2 Zoning Ordinance Amendments

The County administers its General Plan primarily through its Zoning Ordinance. While the General Plan identifies general land use designations, zoning identifies specific uses and development standards. As mandated by the State, the Zoning Ordinance must be consistent with the General Plan, and changes in the General Plan may require an update to the Zoning Ordinance.

- **Organic Materials Ordinance Update**  
(POD-20-015)

On September 14, 2022 (Item #7), the Board of Supervisors voted unanimously to adopt the Organic Materials Ordinance Update, an ordinance amendment for composting standards in the unincorporated area. Planning & Development Services and Department of Public Works developed the Organic Materials Ordinance Update project to help divert organic materials (e.g., food scraps, plant materials, and agricultural materials) from landfills. This was achieved by making amendments to the County's zoning ordinance and

regulatory code to allow organic material processing or composting to occur in more areas of the unincorporated county. Specific changes included:

- Adding more composting allowances on agricultural land;
  - Allowing community composting in residential settings and adding more allowances for composting in community gardens;
  - Creating small- and medium-sized commercial composting categories;
  - Providing more permit options that reduce the cost and time to process composting applications; and,
  - Ensuring the protection of public health and safety by including best management practice requirements to address issues of stormwater runoff, odors, pests, and others.
- **Ordinance Amendments to Establish Procedures for the Closing of Inactive Permit Applications**

This ordinance amendment amended the Zoning Ordinance and Subdivision Ordinance to regulate how discretionary permits are handled if there is no activity by the applicant to complete processing the permit by mandating the permit be automatically withdrawn by PDS staff from consideration after two consecutive years of inactivity unless an extension is requested. In that case, two additional two-year extensions may be granted, depending on the circumstances. This Ordinance Amendment replaces Board Policy I-137.

## 2.2 Projects

### 2.2.1 Major Housing Projects

Privately initiated discretionary development applications vary from small-scale administrative permits and boundary adjustments to large complex projects such as tentative maps. For the purpose of this annual report, discretionary development applications were limited to those which relate to land planning and development activities and do not re-list discretionary actions associated with the GPAs above. Further, this report does not include administrative activities or permits unrelated to residential development such as permits related to wireless facilities, major use permits, and other administrative actions.

Table 1 summarizes the number of applications submitted, approved, or denied/withdrawn since the 2011 adoption of the General Plan Update. During 2022, a total of 308 applications were received. Of these, 176 applications were approved and 30 applications were denied or withdrawn. The following sections represent 17 of the 176 approvals. These 17 projects were selected because they include dwelling units (DUs) associated with the buildout of the General Plan. The remaining approvals include non-residential uses or are associated with GPAs previously described. Table 2 summarizes the 17 major approved discretionary projects.

| Table 1. Summary of Discretionary Actions (Number of Applications) |                 |          |                    |
|--------------------------------------------------------------------|-----------------|----------|--------------------|
| Years                                                              | New Submissions | Approved | Denied / Withdrawn |
| Aug. 2011 - 2012                                                   | 442             | 299      | 97                 |
| 2013                                                               | 211             | 286      | 51                 |
| 2014                                                               | 319             | 213      | 42                 |
| 2015                                                               | 314             | 204      | 52                 |
| 2016                                                               | 263             | 191      | 43                 |
| 2017                                                               | 297             | 163      | 24                 |
| 2018                                                               | 298             | 149      | 12                 |
| 2019                                                               | 445             | 279      | 17                 |
| 2020                                                               | 397             | 366      | 31                 |
| 2021                                                               | 353             | 263      | 30                 |
| 2022                                                               | 308             | 176      | 30                 |
| Total                                                              | 3,647           | 2,589    | 429                |

| Table 2. Summary of Major Approved Discretionary Action Types |                             |
|---------------------------------------------------------------|-----------------------------|
| Project Type                                                  | Number of Projects Approved |
| Tentative Map                                                 | 2                           |
| Tentative Parcel Map                                          | 6                           |
| Site Plan                                                     | 7                           |
| Total                                                         | 17                          |

### 2.2.2 Tentative Maps

In 2022, two tentative map (TM) (including one time extension) applications were approved for 35 DUs. A tentative map is the subdivision of a lot or lots into a total of five lots or more. Table 3 shows the number of housing units approved through the tentative map subdivision process:

**Table 3. Tentative Maps Approved**

|    | ID      | Project Name                         | Community          | EJ Community | Housing Units |
|----|---------|--------------------------------------|--------------------|--------------|---------------|
| 1. | TM-5639 | Escondido Estates                    | North County Metro | No           | 20            |
| 2. | TM-5286 | East Lakeview Revised TM and TM 5286 | Lakeside           | No           | 15            |
|    |         |                                      |                    | <b>Total</b> | <b>35</b>     |

### 2.2.3 Tentative Parcel Maps

In 2022, six tentative parcel map (TPM) applications were approved for 15 DUs (four of these applications were SB-9 TPMs). Tentative parcel maps are subdivisions of four lots or less. Table 4 shows that the number of housing units approved through the tentative parcel map subdivision process:

**Table 4. Tentative Parcel Maps Approved**

|    | ID         | Project Name                    | Community    | EJ Community | Housing Units |
|----|------------|---------------------------------|--------------|--------------|---------------|
| 1. | TPM-21280  | Flinn Springs Road TPM          | Lakeside     | No           | 2             |
| 2. | TPM-21279  | Hurrell Subdivision             | Lakeside     | No           | 5             |
| 3. | TPM-21284* | Fixer SD Tropico                | Valle De Oro | Partially    | 2             |
| 4. | TPM-21312* | Hallak TPM 2 Lot SB9 (COUNTER)  | Valle De Oro | Partially    | 2             |
| 5. | TPM-21298* | Doudna SB-9                     | Valle De Oro | Partially    | 2             |
| 6. | TPM-21306* | Shamasha 2 Lot SB 9 Subdivision | Valle De Oro | Partially    | 2             |
|    |            |                                 |              | <b>Total</b> | <b>15</b>     |

### 2.2.4 Site Plans

In 2022, seven residential site plans (STP) were approved for 17 DUs. Site plans are permits which regulate physical design, siting, and vehicular/pedestrian access; these projects do not subdivide lots and have housing product types that include multi-family. Table 5 shows the number of housing units approved through the site plan process:

| Table 5. Site Plans Approved |                                        |                |              |               |
|------------------------------|----------------------------------------|----------------|--------------|---------------|
| ID                           | Project Name                           | Community      | EJ Community | Housing Units |
| 1. STP-15-027                | Lamar Site Plan "B" Designator         | Spring Valley  | Yes          | 11            |

| Total                        |                                        |                |              | 17            |

### 2.2.5 Other Site Plans

In 2022, one residential Major Use permit and one Density Bonus were approved for 91 DUs. Table 6 shows the number of housing units approved through the site plan process:

| Table 6. Other Site Plans Approved |                                 |                    |              |               |

| 2. PDS2021-MUP-21-010              | Facello "P" Designator Waiver   | North County Metro | No           | 15            |
| Total                              |                                 |                    |              | 91            |

## **2.2.6 County Projects**

### **2.2.6.1 CAP Implementation Progress**

The County continued to implement the measures contained in the 2018 Climate Action Plan (2018 CAP), including preparing updates to the Zoning Ordinance to make it easier to process organic materials in 2022 to work toward achieving the CAP's target to divert 80% of solid waste away from landfills by 2030 (CAP Measure SW-1.1); issuing the fourth CAP Annual Monitoring Report for the 2021 calendar year, which shows that the County reduced its greenhouse gas emissions by 201,932 metric tons; and permitting an equivalent of 12,531 residential solar photovoltaic systems in 2022 to increase renewable energy generation at homes in the unincorporated communities (CAP Measure E-2.3).

### **2.2.6.2 EJ Element Additional Criteria**

Staff initiated a project to identify additional Environmental Justice (EJ) criteria to expand the identification of EJ communities (General Plan Implementation Items 7.1.1.A and 7.1.1.B). Staff created a robust stakeholder engagement plan, engagement materials, and began conducting both internal and external stakeholder engagement. Outreach with both internal and external stakeholders aims to ensure engagement, understanding, and transparency throughout the project and provide clear communication about how public input will inform identification of criteria. Staff began analyzing various data sources and best practices, which in conjunction with input received during stakeholder engagement, will inform additional criteria options that will be brought back to the Board in 2023.

Working groups were established and held between internal departments to coordinate implementation of the EJ implementation plan to advance health equity and address social determinants in EJ communities and the unincorporated area, as applicable. Staff created a centralized spreadsheet that was shared amongst various departments to allow for departmental updates throughout the year. Staff also began identifying grant opportunities within the EJ implementation plan which will be shared with various departments.

### **2.2.6.3 PACE Program**

The County acquired a total of 482.88 acres of agricultural easements as part of the Purchase of Agricultural Conservation Easements (PACE) program, adding to 2,801 acres of easements acquired by the County since 2013 through the reporting period. The PACE Program promotes the long-term preservation of agriculture in the County of San Diego. Under the PACE Program, willing agricultural property owners are compensated for placing a perpetual easement on their property that limits future uses to agriculture. The acquisitions in 2022 resulted in approximately 532 metric tons of emissions reductions. As of the end of 2022, the County had invested approximately \$9.5 million in agricultural easement purchases.

### **2.2.6.4 MSCP Program**

The County acquired 1,022 acres of land to be preserved as part of the Multiple Species Conservation Program (MSCP), expanding to approximately 26,270 acres of preserve land acquired by the County

since 1998 and resulting in approximately 1,300 metric tons of emissions reductions, equivalent to taking 280 gasoline-powered passenger vehicles off the road for one year. The MSCP preserves San Diego's native habitats and wildlife for future generations. It works across political boundaries, providing a unique framework that balances region-wide conservation efforts with streamlined building regulations and permit processes to support healthy community growth.

To date, the County has invested over \$132 million in property acquisition for the MSCP, leveraging an additional \$96.3 million from partner organizations and grant sources. On October 28, 2020 (6), the Board unanimously directed staff to continue to work with stakeholders to prepare the draft North County MSCP as a Federal Habitat Conservation Plan and State Natural Communities Conservation Plan. The federal and State conservation plans both seek the preservation of endangered species. Because an applicant may need an incidental take permit under the federal or State plans, depending on which species is being impacted, it is important to develop an MSCP that complies with both. A greater range of species can be preserved while covering a greater number of projects. Staff anticipates returning to the Board for North County Plan MSCP adoption in 2025.

#### **2.2.6.5 Green Streets Clean Water Plan**

The County of San Diego Watershed Protection Program (WPP) within the Department of Public Works finalized and published the Green Streets Clean Water Plan (the Plan) in April 2022. The Plan is a comprehensive analysis of nearly 1,200 miles of roads in urban centers within unincorporated areas to identify the best locations to accept and treat stormwater runoff while simultaneously identifying opportunities for community enhancements that include sidewalks, bike lanes, vegetation, and tree cover, and identifies multi-benefit green street opportunities within the Village and Rural Residential population centers. Implementation of the Plan supports the County's progress toward achieving targeted pollutant load reductions to comply with the region's regulatory orders such as Total Maximum Daily Loads (TMDLs), and other water quality priorities, as well as aiding in meeting other County goals related to the CAP and decarbonization framework.

The Plan identifies the highest benefit locations for green infrastructure by first focusing project siting in areas with the highest estimated pollutant loading and potential for community benefits using a catchment prioritization or "hot-spots" analysis. After a conceptual feasibility review, projects in those areas were prioritized based on a detailed triple bottom line analysis of environmental benefits (also including benefits beyond water quality), community benefits (including environmental justice elements), and cost-effectiveness.

The Plan also implements a three-step approach to identify green streets project opportunities that provide the highest benefits. The drainage areas with the highest need for green infrastructure were first chosen using factors that included potential pollutant load reduction, existing tree cover, access to parks, and whether the community was at-risk (disadvantaged or low income). Next, the Plan identified the best-suited locations for treatment systems through geospatial (Geographic Information System [GIS]) characterization and screening, as well as visual inspections to help identify opportunities or constraints not captured in the GIS analysis. The identified locations were further screened based on design constraints to ensure that the proposed treatment system met construction requirements and optimal treatment performance.

85 total opportunity areas for green streets are identified in the plan, with the top 30 opportunity areas selected based on the combination of their potential to provide the highest environmental and community benefits, and cost effectiveness. Across the top 30 opportunity areas, it is estimated that 283 acres of total area can be treated with green infrastructure, including up to 80 tree wells and 26 hydrodynamic separators (trash and sediment capture devices). Projects developed in these areas would also provide over 82,000 square feet of green space in underserved communities, plant more than 1,000 trees, and improve 3 miles of sidewalk. Currently, six Preliminary Engineering Reports (PERs) are being developed to initiate development of green streets, including two in the community of Fallbrook, two in Bonsall, one in Spring Valley and one in Lakeside.

## 2.3 Capital Improvements Program

The County of San Diego completed 30 CIP projects, totaling an excess of \$222 million in 2022, as shown in Table 7:

| Table 7. Summary of Capital Improvements Projects Approved |                    |                |
|------------------------------------------------------------|--------------------|----------------|
| Project Type                                               | Number of Projects | Cost           |
| Roads and Infrastructure                                   | 20                 | \$ 44,241,263  |
| Parks and Recreation Facilities                            | 3                  | \$ 12,780,000  |
| County Facilities                                          | 7                  | \$ 165,000,000 |
| Total                                                      | 30                 | \$ 222,021,263 |

### 2.3.1 Roads and Infrastructure

In 2022, 20 road and infrastructure projects were completed totaling more than \$44 million, as shown in Table 8. CIP projects are reviewed for General Plan conformance and presented to community planning and sponsor groups for vetting and scope refinement.

| Table 8. Infrastructure Projects |                                                                     |             |               |              |
|----------------------------------|---------------------------------------------------------------------|-------------|---------------|--------------|
|                                  | Project Name                                                        | Cost        | Community     | EJ Community |
| 1.                               | Willows Road Ridge Scour Mitigation Improvements                    | \$3,176,457 | Alpine        | No           |
| 2.                               | Spring Valley Outfall Sewer Diversion and Meter Abandonment Project | \$1,273,783 | Spring Valley | No           |

**Table 8. Infrastructure Projects**

|     | <b>Total</b>                                                          | <b>\$44,241,263</b> |                             |                     |

### 2.3.2 Parks and Recreation Facilities

In 2022, three park and recreation projects totaling more than \$12 million were completed (Table 9).

| Table 9. Park and Recreation Facilities |                       |              |               |              |
|-----------------------------------------|-----------------------|--------------|---------------|--------------|
| Project Name                            |                       | Cost         | Community     | EJ Community |
| 1.                                      | Ildica County Park    | \$980,000    | Spring Valley | Yes          |
| 2.                                      | Guajome Sewer Project | \$1,800,000  | Oceanside     | No           |
| 3.                                      | Lindo Lake Phase 1    | \$10,000,000 | Lakeside      | No           |
| Total                                   |                       | \$12,780,000 |               |              |

### 2.3.3 County Facilities

In 2022, seven County projects totaling \$165 million were completed (Table 10).

| Table 10. County Facilities |                                                         |               |                |              |
|-----------------------------|---------------------------------------------------------|---------------|----------------|--------------|
| Project Name                |                                                         | Cost          | Community      | EJ Community |
| 1.                          | Youth Transition Campus (Phase 1)                       | \$130,000,000 | Serra Mesa     | No           |
| 2.                          | Palomar Mountain Fire Station 79 Living Quarters        | \$4,000,000   | Palomar        | No           |
| 3.                          | Sunshine Summit Fire Station 59 Expansion               | \$2,200,000   | Warner Springs | No           |
| 4.                          | San Diego Fire Training Center, Prefabricated Buildings | \$1,300,000   | Valle De Oro   | Partially    |
| 5.                          | Probation Community Support Office                      | \$19,000,000  | North Park     | No           |
| 6.                          | Mount Laguna Fire Station 49                            | \$6,300,000   | Pine Valley    | No           |
| 7.                          | Biological Safety Level 3 Modular Laboratory            | \$2,200,000   | Kearny Mesa    | No           |
| Total                       |                                                         | \$165,000,000 |                |              |

## 3 Housing Element

### 3.1 Regional Housing Needs Allocation (Sixth Cycle)

The SANDAG Board of Directors approved the final RHNA Plan for the sixth cycle on July 10, 2020. This RHNA Plan is for the sixth housing element cycle from April 15, 2021, through April 15, 2029. Local governments are responsible for updating their housing elements every eight years to provide sufficient land use and zoning capacity to accommodate their share of housing for each income category. RHNA allocations for each housing element cycle are independent and are not cumulative, this means that units from a previous cycle do not “roll over” into subsequent cycles; from 2021 to 2029, the region has been allocated 171,685 RHNA units. Of the regional allocation, the unincorporated county has been allocated 6,700 units. Table 11 shows the RHNA allocation for the county by income category:

| <b>Table 11. County Allocation of RHNA Housing (2021 – 2029)</b> |                                    |
|------------------------------------------------------------------|------------------------------------|
| <b>Income Category</b>                                           | <b>Allocation (Dwelling Units)</b> |
| Extremely Low and Very Low                                       | 1,834                              |
| Low                                                              | 992                                |
| Moderate                                                         | 1,165                              |
| Above Moderate                                                   | 2,709                              |

### 3.2 Housing Production and Capacity Portal

When the General Plan was updated in 2011, it was estimated that the resulting unbuilt housing capacity in the unincorporated county would be approximately 66,044 dwelling units. This is referred to as the General Plan housing capacity – the number of new housing units allowed by the General Plan that could be constructed on vacant or developed lands.

Community members, environmental groups, and the land development industry have requested information about the County’s housing capacity, where growth is planned to occur, and if the County is on track to build out the General Plan. The Housing Production and Capacity Portal is a tool that will help County staff answer these frequently asked questions. It is a sequence of 12 separate data sets that generate heatmaps of development activity that has occurred since the adoption of the General Plan Update.

Since 2011, there have been many changes that reduce or increase the available residential capacity. These changes include permit applications that have been processed, housing that has been built, new constraints that have been identified, and land that has been purchased for conservation purposes. The Housing Production and Capacity Portal monitors all these activities and updates the available number of housing units projected by the General Plan. Efforts to improve the Housing Production and Capacity Portal are currently underway.

## 4 Service Improvements

### 4.1 Customer Service Improvements

#### 4.1.1 Sustainability Division Social Media

The Sustainability Division started its own social media accounts on Twitter (@SDCoSustainable), Facebook (@SDCountySustainable), and Instagram (@SDCountySustainable) to make it easier to reach audiences active on those platforms.

#### 4.1.2 Fleet Services Division

The Department of General Services' Fleet Services Division has established ongoing, regular discussions with County client departments to increase service delivery for fleet vehicle maintenance, acquisitions, fuel services, and transitions to electric vehicles.

#### 4.1.3 PACE Program

The PACE Program supports existing farming operations and social sustainability by protecting and maintaining agricultural resources and other basic resources such as food throughout the unincorporated region. Following Board adoption of the updated PACE Program guidelines on March 3, 2021 (10), staff have been working on creating a comprehensive public participation plan. The acreage of eligible properties increased over six-fold, thus generating new ways to market to this expanded group was crucial. Staff also received feedback from the farming community about using other methods of marketing beyond the online and email-based methods that were most often used in the past. The objective for the expanded outreach strategy was to accomplish a robust "meet people where they are" engagement plan.

The PACE Program began implementing a variety of mechanisms for soliciting applications for the PACE Program, including distribution of materials in local farm supply stores, social media marketing, newspaper advertisements, presenting at UCCE training and informational sessions, and working closely with local farming organizations, such as the San Diego County Farm Bureau; these efforts are in addition to and not in replacement of our email updates through the PDS listserv and cross-promotion on other County websites. As part of this expanded PACE Program engagement plan, the County of San Diego virtually hosted the inaugural Voluntary Conservation and Land Management Assistance Workshop on January 26, 2022. This event was co-sponsored by the Resource Conservation District of Greater San Diego County, United States Fish and Wildlife Services' Partners for Fish and Wildlife, and University of California Agriculture and Natural Resources.

The event was the first in what the County hopes to become an annual regional workshop with the goal of connecting property owners, farmers, land managers, and other organizations with existing funding opportunities, technical assistance, and organizations that support conservation efforts and sustainable land management practices. Through this one-stop-shop, the County and its partners hope to bring awareness to these programs and increase accessibility for those who may be interested in participating but may not have heard of these programs previously. The second annual Voluntary Conservation and

Land Management Assistance Workshop is currently forecasted for March 2023. Because the PACE Program relies on voluntary participation, stakeholder coordination is integral to its success, and stakeholder outreach and regional coordination are planned to continue for the foreseeable future.

#### **4.1.4 Organic Materials Zoning Ordinance Update**

The Organic Materials Ordinance Update was shaped by robust community input from stakeholders throughout the unincorporated area of the county to guide changes to the Zoning Ordinance and Regulatory Code of Ordinances that will serve the community and the agriculture economy. The ordinance update drives economic growth and development by lowering permit requirements and associated costs, increasing allowable composting practices, and increasing areas where composting can occur for individuals interested in the commercial processing of organic materials and the production of high-quality compost. The ordinance update also reduces barriers to organic material processing opportunities and partnerships, advances opportunities for economic growth, and increases opportunities for the County's agricultural workforce and operations.

#### **4.1.5 Green Streets Clean Water Plan Outreach & Engagement**

During development, the Green Streets Clean Water Plan piloted a novel public outreach and engagement approach that focused on advertising and targeted messaging at the neighborhood scale. The approach to enhancing program awareness included branding, outreach, multi-lingual educational materials including web content, development of informational videos, surveys to local stakeholders to gather community-specific preferences, flyers, and social media content. Although the bulk of the outreach effort was conducted during the COVID-19 pandemic, lessons learned with applicability beyond the pandemic were memorialized to inform future outreach efforts.

### **4.2 Sustainability and Technology Improvements**

#### **4.2.1 Electric Vehicles Roadmap (EV Roadmap)**

The County has continued to implement the Electric Vehicle Roadmap (EV Roadmap) which was adopted by the Board on October 16, 2019. The EV Roadmap includes strategies to increase EV ownership and use, install charging infrastructure, and identify grant opportunities. As part of the EV Roadmap, staff provide annual reports to the Board. The 2021 EV Roadmap Annual Report was provided to the Board on April 19, 2022. As of December 31, 2021, the County fleet included 77 EVs, 45 publicly accessible EV chargers had been installed at County facilities, and an estimated 13,554 metric tons of carbon dioxide equivalent had been avoided through telecommuting. Additionally, the County deployed EV charger permit streamlining and implemented a Renewable Energy Fee Waiver Pilot Program to encourage private EV charger installation, and built and launched the EV Consumer Guide website to provide general and technical support for residents and businesses throughout the region. The County will continue to implement the EV Roadmap and incorporate relevant activities into the CAP Update as greenhouse gas reduction measures.

## Appendix 1 – Annual Housing Element Progress Report

Each jurisdiction (city council or board of supervisors) must prepare an Annual Progress Report (APR) on the jurisdiction's status and progress in implementing its housing element (Government Code Section 65400(2)(B)). The following pages include information on entitled projects, building permits issued, and Certificates of Occupancy. Entitled projects are analogous to discretionary projects approved by the Board, Planning Commission, or PDS Director. Certificates of Occupancy are analogous to completed building permits issued by the Building Division. The format of the following tables is established by the State of California, Department of Housing and Community Development (HCD) and the information is transmitted to HCD electronically.
