Subject: No Eucalyptus!
Date: Friday, September 15, 2017 11:09:51 AM
Attachments: image001.png

Eucalyptus trees are a really poor choice to plant in CA. Many are invasive, they are brittle and fall often killing people and damaging property. They are prone to many pests and use more than 250 gal of water a day when mature. CA native oaks, sycamores and other native trees are far better. NO EUCS!!!!
