Re: Greenhouse Gas (GHG) Reduction Strategies and Measures

Dear Sirs,

I am a 27 year resident of Valley Center and this issue is extremely important to me and my family for the reasons stated below. We need roundabouts in Valley Center!

Roundabouts significantly decrease fuel consumption and emissions and should be added as a **Climate Action Plan strategy to reduce GHG emissions**.

According to the San Diego Air Pollution Control District (APCD) document on **Modern Roundabouts**, each roundabout can eliminate 189 metric tons of CO2 emissions annually. As noted in the APCD document, in addition to significant CO2 emissions and improved air quality, roundabouts provide other significant multi-modal benefits including increased safety for vehicles and pedestrians, and improved traffic flow.

Thank you for adding roundabouts to the CAP GHG emission reduction strategies.

Sincerely,

Michael Almer

I20-1 The comment recommends that the CAP should include roundabouts in its reduction strategies. Please see response to comment I7-2.
