**Subject:** County of San Diego, **Climate Action Plan (CAP), Draft**

**Re:** **Greenhouse Gas (GHG) Reduction Strategies and Measures**

Dear Sirs,

Roundabouts significantly decrease fuel consumption and emissions. They should be added to the County **Climate Action Plan** as a strategy to reduce GHG emissions.

According to the San Diego Air Pollution Control District (APCD) document on **Modern Roundabouts**, each roundabout can eliminate 189 metric tons of CO2 emissions annually. As noted in the APCD document, in addition to significant CO2 emissions and improved air quality, roundabouts provide other significant multi-modal benefits including increased safety for vehicles and pedestrians, and improved traffic flow.

I26-1

Thank you for adding roundabouts to the CAP GHG emission reduction strategies.

Sincerely,

Lael Montgomery

## Response to Comment Letter I26

**Lael Montgomery**  
**September 16, 2016**

**I26-1** The comment states that roundabouts should be included in the CAP and describes the benefits of implementing roundabouts. Please see response to comment I7-2.
