## Response to Comment Letter I3

**Jeffrey Kent**  
**August 11, 2017**

**I3-1** The County acknowledges the opinion of the commenter that additional regulations are costly. This comment does not address the adequacy of the Draft SEIR and no further response is required. However, the comment will be included in the Final EIR and made available to the decision makers prior to a final decision on the project.

How can I make a comment without seeing the document in its entirety? This is most ridiculous. I will say if the demands are too severe we will declare bankruptcy as the regulations in the state of California are so much worse than say in Florida. The price of a product produced in Florida is about 1/3 that of California. So maybe you want us to move their and that will solve your GH Gas emission problem! Too bad, unemployment will become a big issue for you to handle.
