APPENDIX F-1
Campo Wind Preliminary ESA
MEMORANDUM

To:  Dan Hall, Bureau of Indian Affairs;  
     County of San Diego Planning and Development Services  
cc:   David Hochart, Matt Valerio – Dudek, Environmental  
From:  Glenna McMahon, Audrey Herschberger – Dudek, Hydrogeology/HazWaste  
Subject:  Preliminary ESA for Campo Wind Facilities  
Date:  January 22, 2019; Updated October 16, 2019  
Attachments:  Figure 1 – Campo Wind Facilities Location and Site Map  
               A – GeoSearch Report  
               B – Historic Aerial Photographs  
               C – Letter from EPA to Bureau of Indian Affairs Regarding Draft Supplemental  
                  Environmental Impact Statement, May 12, 2010

This Preliminary Environmental Site Assessment (ESA) was conducted for the portion of the Campo Wind Project with Boulder Brush Facilities (Project) that is located on the Campo Band of Diegueño Mission Indians Reservation (Reservation) in San Diego County, California (Campo Wind Facilities). Construction and development of the Campo Wind Facilities would be within a corridor of approximately 2,000 acres of land defined as the Campo Corridor. The Campo Corridor is located entirely within the approximately 16,000-acre Reservation, the borders of which define the Reservation Boundary. This Preliminary ESA covers the Campo Wind Facilities, and discusses findings from within the Reservation Boundary that could impact the Campo Corridor. The Reservation Boundary, Campo Corridor, and locations of findings identified in this Preliminary ESA are shown in Figure 1.

A Phase I ESA was prepared by AECOM in January 2012 (2012 Phase I ESA) (AECOM 2012). The findings of the previous ESA are discussed in this 2019 Preliminary ESA.

Physical setting information, including hydrology; geology; and water, oil, and gas wells, is included in the GeoSearch E RecSearch Report (GeoSearch Report) provided as Attachment A. The information is also summarized in Section 3 of the 2012 Phase I ESA. In addition, a Groundwater Resources Evaluation was conducted by Dudek in 2018 (Dudek 2018). Groundwater depths are reported between approximately 21 and 76 feet below ground surface. Groundwater depth data was obtained from a 312-acre well field located in the southern portion of the Reservation around a proposed regional landfill, which was proposed as part of a separate tribal project (see Figure 1). Groundwater flow directions for the Reservation were not evaluated as part of this Preliminary ESA. Drinking water is provided to the Reservation by potable water wells. Soils on the Reservation are generally undeveloped, well-drained loamy coarse sands (Attachment A).
The objective of this Preliminary ESA is to determine if there are any recognized environmental conditions (RECs), including controlled RECs and historical RECs, that affect the Campo Corridor. For the purposes of this Preliminary ESA, Dudek is using the REC definitions as defined in ASTM 1527-13:

- A REC is the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.
- A controlled REC (CREC) is a REC from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.
- A historical REC (HREC) is a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meets unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

This Preliminary ESA consists of review and summary of the following: regulatory agency records, historical aerial photographs, and previous environmental reports. This Preliminary ESA is not a complete Phase I ESA as defined by ASTM 1527-13. This Preliminary ESA meets the requirements of Section 1.2 of the County of San Diego Guidelines for Determining Significance – Hazardous Materials and Existing Contamination (County of San Diego 2007). Because the County of San Diego Guidelines does not require a full Phase I ESA, one was not conducted for the Reservation.

A search of regulatory records was conducted by GeoSearch on July 25, 2018 (GeoSearch Report). The search was conducted for the Reservation according to ASTM E 1527-13 using standard search radii, which are listed in the GeoSearch Report (Attachment A). The GeoSearch Report provides a list of sites within an approximately 1-mile radius of the Reservation that are listed on one or more environmental regulatory databases. Information in these listings includes the site name, location of the site relative to the Reservation, regulatory database listing, and the status of the listed site. The complete GeoSearch Report is included as Attachment A.

The Reservation and adjoining properties were identified in the regulatory databases described in Table 1, Regulatory Databases Identified. Listings identified within the Reservation are summarized in Table 2, Reservation Regulatory Database Listings. Findings for adjoining and nearby properties are discussed below under the subheading “Adjoining or Nearby Properties.” Listings identified as RECs are shown in Figure 1.

<tr>
<td>Campo Materials Inc./Campo Materials Company 36501 Church Road, Campo, California</td>
<td>CAHWTS USFRSCA (OSHA-IMIS) USMSHA</td>
<td>The Campo Materials company is listed in the Occupational Safety and Health Administration–Integrated Management Information System (OSHA-IMIS) database and U.S. Mining Safety and Health Administration (USMSHA) database as a mining site. The site has numerous citations and associated fines recorded from 2000 to 2017. The nature of the citations are not reported. According to information in the California Hazardous Waste Tanner Summary (CAHWTS) database, hazardous wastes, including hydrocarbon solvents, waste oil, and mixed oil, were generated on site and manifested in 2008 prior to removal off site. There are no violations associated with this listing. Based on the information provided, this company has a history of non-compliance, and handles hazardous materials on site. This information is indicative of a potential release of hazardous materials to the environment, or the potential of a future release to the environment.</td>
<td>The Campo Corridor crosses BIA Road 10 (Church Road) approximately 0.1 miles from the entrance to the Campo Materials site. Based on aerial photographs, it appears that the sand and gravel pit operations are approximately 1 mile west of the entrance to the Campo Materials site. The Campo Corridor appears to transect the sand and gravel pit. Therefore, there is a potential for this site to impact the Campo Corridor.</td>
<td>Yes (Site #2 and Site #3)</td>
</tr>
</tbody>
</table>

| Kumeyaay Wind LLC Gamesa Winds US LLC 400002 Tusil Road, Boulevard, California | HWTS FRSCA (OSHA-IMIS) | This site is registered as an electrical machinery and equipment company. Manifests indicate handling and generation of hazardous wastes from 2006 to 2016. Some management includes on-site treatment/stabilization of “other organic solids.” There are no other details associated with this listing, and there are no violations associated with the listing. | The GeoSearch Report identifies this location at the southeast corner of Tusil Road and Old Mine Road. This location is adjacent to the northern boundary of the Campo Corridor. | No |

REC = recognized environmental condition; BIA = Bureau of Indian Affairs

Adjoining or Nearby Properties

Camp Lockett is a former U.S. Army camp previously used for cavalry training and border defense beginning in 1941. Portions of the camp have been released to other owners, including the County of San Diego. Based on information obtained from a 2007 Site Inspection Report, the property is known or suspected to contain military munitions and unexploded ordinances. The Site Inspection Report identifies the nearest possible impact area to be approximately 0.5 miles west of the Reservation. The remaining potentially impacted areas (identified as munition response sites) are greater than 1 mile west of the Reservation. Explosives were not detected in any soil samples collected during the site inspection (Parsons 2007). Although possible migration and exposure pathways exist in the munition response sites identified at Camp Lockett, the distance from the Reservation indicates it is unlikely that these sites have impacted the environmental condition of the Reservation.

An additional six sites were identified within a 1-mile radius of the Reservation. Following is a brief description of each listing:

- The Manzanita Reservation was identified adjoining to the north, and La Posta Reservation adjoining to the west.
- Five underground storage tanks (USTs) were identified at a market at Live Oaks Trail, located 0.1 miles south of the border of the Reservation. The USTs were reportedly installed in 2013 and are permitted by the San Diego County Department of Environmental Health. There are no violations or releases associated with this listing.
- An aboveground storage tank containing diesel fuel was identified 0.16 miles west of the Reservation. Based on information obtained from the California Environmental Protection Agency website, the
aboveground storage tank is located at a Century Link telecommunication site. One administrative violation was received at the Century Link site in 2015. Compliance was achieved the same month. The violation does not indicate a release or threat of future release of hazardous materials (CalEPA 2019).

- An unpermitted solid waste disposal site was identified 0.44 miles east of the Reservation. No additional information is available. No cleanup files are associated with the listing.
- An inactive cleanup site regulated by the Department of Toxic Substances Control was identified 0.9 miles from the Reservation border. The site is a Formerly Used Defense Site (FUDS). As of 2005, the status was “inactive – needs evaluation.” No additional actions have been taken.

Based on the available information, status, and/or distance from the Reservation, these sites do not appear to pose a REC.

Aerial Photographs

Historical aerial photographs (Attachment B) were reviewed to determine if there was evidence of RECs within the Reservation that could potentially impact the Campo Corridor. Historical aerial photographs from 1942, 1953, 1956, 1968, 1975, 1984, 1994, 1995, 1996, 2005, 2009, and 2016 were reviewed. Observations are presented in Table 3, Historical Aerial Photograph Review.

<tbody>
<tr>
<td>1984</td>
<td>Additional small roads are observed throughout the Reservation, but the road density is still sparse. New development (roads, cleared vegetation, and small buildings) is observed near the current Campo Materials site. The sand pit area appears disturbed. An area of development is observed at the northeast corner of Campo Road and Bureau of Indian Affairs (BIA) Road 10. Disturbance and cleared areas are now observed on the west side of the railroad near the southeastern corner of the Reservation.</td>
<td>A small residential neighborhood is observed east of the Reservation, with new development surrounding it. The surrounding areas still appear mainly undeveloped, except for a few small roads and residential/agricultural properties.</td>
</tr>
<tr>
<td>1994</td>
<td>A new clearing is observed off BIA Road 10, just south of Old Highway 80. A new small housing development (approximately 16 houses) is observed off Campo Road (on Kumeyaay Road). A series of small dirt roads and cleared areas are now observed in the southeast corner of the Reservation in the bend of the railroad tracks.</td>
<td>The surrounding areas show new development, which appears to be residential. The development is sparse.</td>
</tr>
<tr>
<td>1996</td>
<td>Two artificial ponds are now observed at the sand pit. No other apparent changes from the 1994 aerial photograph are observed.</td>
<td>No apparent changes from the 1994 aerial photograph are observed.</td>
</tr>
<tr>
<td>2005</td>
<td>Construction of wind turbines is now observed in the northern portion of the Reservation. The casino is now observed on the south side of I-8. The motocross track is now observed near the northeast corner of the Reservation. Roads transect the land between Campo Materials and the sand pit, and the sand pit is disturbed. Some new small roads are observed throughout the southern half of the Reservation, with apparent residential development.</td>
<td>More residential development and supporting commercial development is observed. Development is still sparse.</td>
</tr>
<tr>
<td>2009</td>
<td>The wind turbines are now constructed, and new development at the casino is now observed. No other apparent changes are observed from the 2005 aerial photograph.</td>
<td>No apparent changes are observed from the 2005 aerial photograph.</td>

Previous Environmental Report

The subject property as defined in the 2012 Phase I ESA (AECOM 2012) is a “highly irregular, snake shaped property” that is located within the boundaries of the Reservation as defined by this Preliminary ESA. The 2012 Phase I ESA did not identify any RECs or de minimis conditions. Campo Corridor conditions do not appear to have changed since the 2012 Phase I ESA based on the latest search of available records and limited identified development during the intervening period.
Memorandum

Subject: Preliminary ESA for Campo Wind Facilities

The 2012 Phase I ESA identified multiple locations of concern that were determined not to be RECs for the purposes of that report (AECOM 2012), but Dudek has determined them to be RECs to the Reservation in this 2019 Preliminary ESA. These sites, located within the Reservation, are as follows:

- **Golden Acorn Casino Gas Station.** Based on a review of recent aerial photographs, it appears there are two fuel islands and an associated UST farm located on the south side of the casino. The Golden Acorn Casino was opened in 2001 (Campo Kumeyaay Nation 2019), and historical aerial photographs (Attachment B) confirm that the gas station islands were present at approximately the same time. Registration of these USTs was not listed in the GeoSearch Report (Attachment A), and was not identified on the California Environmental Protection Agency Site Portal (CalEPA 2019). Based on the lack of information and apparent lack of regulation of these USTs, they pose a REC (Figure 1 Site #5).

- **Former Illegal Dump Site.** A residential property on the Reservation was previously recognized as a former illegal disposal site. Items dumped included abandoned vehicles. The Campo Environmental Protection Agency² conducted a cleanup in 2007, reported with a grant from the California Environmental Protection Agency, which included removing abandoned cars. During the 2012 Phase I ESA site reconnaissance performed by AECOM in October 2011, an approximately 500-foot by 500-foot area of scattered debris was still observed at the site (AECOM 2012). Because this was an illegal dump site for an unknown number of years, because dumping included abandoned vehicles, and because parts of the vehicles were still observed 4 years later, these are conditions indicative of a release to the environment, and the site poses a REC (Figure 1 Site #6).

- **Campo Materials Co.** The 2012 Phase I ESA identified multiple violations under the Mining Safety and Health Administration associated with operations of the Campo Materials mine between October 2004 and June 2010 (AECOM 2012). Penalties were assessed on all violations; some penalties were contested. Based on information obtained from the Mine Data Retrieval System, most of the violations were 104(a) citations, which indicate a violation of a standard, regulation, or section of the Mine Act. One violation was a 104(g)(1) citation, which indicates the withdrawal of an untrained miner from the mine (U.S. Department of Labor, Mine Safety and Health Administration 2019). Campo Materials Co. also reported fuel blending of large quantities of hydrocarbon solvents and waste and mixed oils prior to energy recovery at another site, indicating the use of petroleum products within the Reservation. The history of violations associated with operations, and the handling of hazardous materials on the mine site are conditions indicative of a release to the environment, or that pose a material threat of a future release to the environment; they are considered a REC (Figure 1 Sites #2 and #3).

The following locations were identified in the 2012 Phase I ESA to be of potential environmental concern, but are not considered to be RECs (AECOM 2012):

- **Campo Landfill Project:** This proposed landfill is to be located in the southeast corner of the Reservation. A letter response from the U.S. Environmental Protection Agency to the Bureau of Indian Affairs concerning the Draft Supplemental Environmental Impact Statement for the landfill project states that insufficient information has been presented in the Draft Supplemental Environmental Impact Statement regarding protection of groundwater (EPA 2010; Attachment C). More recent documentation regarding the progress

---

² The Campo Environmental Protection Agency was created by order of the General Council of the Campo Band of Kumeyaay Indians in July 1990 (http://www.campo-nsn.gov/cepa.html).
Memorandum

Subject: Preliminary ESA for Campo Wind Facilities

of this landfill was not located during research for this Preliminary ESA. There are no listings for this landfill located on or near the Reservation in the Solid Waste Information System online database (CalRecycle 2019). Based on this information, it does not appear that the proposed landfill project is active.

- **Off-Site Casino Former UST Farm:** A fuel depot was proposed east of the Golden Acorn Casino, located at the southeast corner of the intersection of Bureau of Indian Affairs (BIA) Road/Old Highway 80 and Interstate 8. Reportedly, USTs were installed as part of this proposal. The fuel depot was later abandoned prior to completion, and the USTs, which were not filled, were removed.

Summary and Conclusions

The Reservation was mainly undeveloped, with sparse residential and agricultural development, since at least 1942 until approximately 1984. Construction of Interstate 8 began in approximately 1968, and commercial use of the sand pit appears to have started between 1975 and 1984. The Golden Acorn Casino on the Reservation was opened in 2001, wind turbines were constructed starting in 2005, and additional residential development occurred throughout the 1970s until at least 2009.

Based on the information obtained, the following RECs are present within the Reservation. Based on the proposed use of the Campo Corridor, recommendations for further investigations are also provided.

- The Golden Acorn Casino has a documented, unpermitted solid waste disposal site. The type, duration, and manner of disposal is unknown. Given the known use and lack of additional information available, which indicates a potential release to the environment, this site is considered a REC. Based on the site address, this listing is located on BIA Road 10 (Church Road), approximately 450 feet north of the intersection of BIA Road 10 and State Route 94 (Campo Road). The Campo Corridor transects the Reservation at the BIA Road 10/State Route 94 intersection, which lies less than 1/8 of a mile from this potential REC. Because the limits, exact location, and impacts of the disposal site are unknown, it is possible that it could impact the Campo Corridor. If this area were to be developed as part of the Campo Wind Facilities, it is recommended that a site visit be conducted and additional information from a site representative be obtained to determine the nature and extent of the disposal site. Further, a Hazardous Materials Contingency Plan (HMCP) should be prepared and implemented during construction of the Campo Wind Facilities. The HMCP would outline strategies for managing hazardous materials, including contaminated soil and groundwater, which may be encountered during construction of the Campo Wind Facilities.

- The Golden Acorn Casino has two fuel islands and an associated UST farm located on the south side of the property. The casino was opened in 2001 (Campo Kumeyaay Nation 2019), and historical aerial photographs confirm that the gas station islands were present at approximately the same time (Attachment B). Documentation of the registration of the USTs could not be obtained during this Preliminary ESA. The Golden Acorn Casino is located on the east side of the intersection of I-8 (Kumeyaay Highway) and Old Highway 80. The Campo Corridor lies approximately 0.25 miles southeast and approximately 0.25 miles north of these fuel islands, and therefore, the presence of the fuel islands and tanks are not likely to impact the Campo Corridor. It should be determined if these USTs are in compliance with applicable regulatory standards, and if there is any evidence of releases to the environment. If this area were to be developed as part of the Campo Wind Facilities, the USTs should be properly removed and disposed of. If the tanks cannot be located and/or the status of the tanks is still in question, an HMCP should be prepared and implemented during construction of the Campo Wind Facilities.
The Campo Materials Company has numerous Mining Safety and Health Administration citations and associated fines recorded from 2000 to 2017. Based on the information provided in the fines, this company has a history of non-compliance and handles hazardous materials on site. This information is indicative of a potential release of hazardous materials to the environment, or the potential of a future release to the environment. The Campo Corridor crosses BIA Road 10 (Church Road) approximately 0.1 miles from the entrance to the Campo Materials site. The extent of operations and hazardous materials storage areas were not determined during this Preliminary ESA. Therefore, there is potential for this location to impact the Campo Wind Facilities. Information regarding management of hazardous materials should be obtained and reviewed, if available, to determine the environmental condition of the site. If site conditions are indicative of a concern, an HMCP should be prepared and implemented during construction of the Campo Wind Facilities.

Three USTs owned by the California Department of Transportation (Caltrans) are located within the Reservation: two 1,000-gallon diesel fuel tanks installed in 1961, and one 3,000-gallon unleaded fuel tank installed in 1975. This site is located near the Caltrans Boulevard Maintenance Station, located on Old Highway 80. The exact UST locations should be determined. Based on the age of the tanks and the lack of environmental regulations regarding tanks at the date of installation, these tanks present conditions indicative of a release or material threat of a future release, and are therefore considered a REC. Based on the GeoSearch Report (Attachment A), the Caltrans Boulevard Maintenance Station is located at the southeast corner of Old Highway 80 and Golden Acorn Way. Because this location is more than 0.25 miles from the nearest portion of the Campo Corridor, it does not appear that this REC will impact the Campo Corridor. However, the exact location of the USTs needs to be confirmed to determine potential impacts to the Campo Corridor. The condition, maintenance, and operational status of the USTs should also be determined. If this information cannot be obtained or indicates potential impacts to the Campo Wind Facilities, an HMCP should be prepared and implemented during construction.

Camp Lockett is a former U.S. Army camp previously used for cavalry training and border defense beginning in 1946. The property is known or suspected to contain military munitions and explosives of concern, and therefore may present an explosives hazard. The explosive areas are unknown, and the camp abuts the Reservation. Portions of the Campo Corridor are located along the western boundary of the Reservation, adjacent to Camp Lockett. A munitions and explosives of concern survey may need to be conducted on the Campo Corridor (or a portion of the Campo Corridor) to determine potential environmental and/or safety concerns. Coordination with Camp Lockett should occur prior to construction to determine if munitions and explosives of concern are located on or near these areas, and if a munitions and explosives of concern survey is required.

A former residential dump site was identified during the 2012 Phase I ESA. Because this was an illegal dump site for an unknown number of years, dumping included abandoned vehicles, and parts of the vehicles were still observed four years later, these are conditions are indicative of a release to the environment. This former dump site is located approximately 0.22 miles east of the nearest portion of the Campo Corridor. Based on the distance from the Campo Corridor, surficial soil impacts at the former dump site are not likely to impact the Campo Corridor. Groundwater impacts, if any, are unknown. If the area would be developed as part of the Campo Corridor, the current condition of this site should be assessed to determine the potential presence of hazardous substances or petroleum products. In addition, an HMCP should be prepared and implemented during construction of the Campo Wind Facilities.

Aerial photographs indicate the presence of buildings on the Reservation since at least 1942 (Attachment B). Based on the age of the buildings, there is a potential for asbestos-containing materials and lead-based paint to be present. A survey of asbestos-containing materials and lead-based paint should be conducted prior to the demolition of structures built before 1980.
Memorandum
Subject: Preliminary ESA for Campo Wind Facilities

This report was designed by GeoSearch to meet or exceed the records search requirements of the All Appropriate Inquiries Rule (40 CFR §312.26) and the current version of the ASTM International E1527, Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process or, if applicable, the custom requirements requested by the entity that ordered this report. The records and databases of records used to compile this report were collected from various federal, state and local governmental entities. It is the goal of GeoSearch to meet or exceed the 40 CFR §312.26 and E1527 requirements for updating records by using the best available technology. GeoSearch contacts the appropriate governmental entities on a recurring basis. Depending on the frequency with which a record source or database of records is updated by the governmental entity, the data used to prepare this report may be updated monthly, quarterly, semi-annually, or annually.

The information provided in this report was obtained from a variety of public sources. GeoSearch cannot ensure and makes no warranty or representation as to the accuracy, reliability, quality, errors occurring from data conversion or the customer's interpretation of this report. This report was made by GeoSearch for exclusive use by its clients only. Therefore, this report may not contain sufficient information for other purposes or parties. GeoSearch and its partners, employees, officers and independent contractors cannot be held liable for actual, incidental, consequential, special or exemplary damages suffered by a customer resulting directly or indirectly from any information provided by GeoSearch.

DISPOSAL METHOD: LAND TREATMENT OR APPLICATION(TO INCLUDE ON-SITE TREATMENT AND/OR STABILIZATION)
YEAR: 2006
TSD ID: ARZ000002428
GENERATOR COUNTY: SAN DIEGO
DISPOSAL COUNTY: UNKNOWN
WASTE CATEGORY: OTHER INORGANIC SOLID WASTE
AMOUNT DISPOSED (TONS): 14.3200
DISPOSAL METHOD: LANDFILL OR SURFACE IMPOUNDMENT THAT WILL BE CLOSED AS LANDFILL( TO INCLUDE ON-SITE TREATMENT AND/OR STABILIZATION)

www.geo-search.com  888-396-0042
**Hazardous Waste Tanner Summary (HWTS)**

**DISPOSAL METHOD:** DEEPWELL OR UNDERGROUND INJECTION (WITH OR WITHOUT TREATMENT)

**YEAR:** 2006  
**TSD ID:** AZR000002428  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** UNKNOWN  
**WASTE CATEGORY:** OTHER INORGANIC SOLID WASTE  
**AMOUNT DISPOSED (TONS):** 14.3200

**DISPOSAL METHOD:** DISCHARGE TO SEWER/POTW OR NPDES (WITH PRIOR STORAGE--WITH OR WITHOUT TREATMENT)

**YEAR:** 2006  
**TSD ID:** AZR000002428  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** UNKNOWN  
**WASTE CATEGORY:** OTHER INORGANIC SOLID WASTE  
**AMOUNT DISPOSED (TONS):** 14.3200

**DISPOSAL METHOD:** LAND TREATMENT OR APPLICATION (TO INCLUDE ON-SITE TREATMENT AND/OR STABILIZATION)

**YEAR:** 2006  
**TSD ID:** CAD088504881  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** ORANGE  
**WASTE CATEGORY:** BLANK OR UNKNOWN  
**AMOUNT DISPOSED (TONS):** 0.0000

**DISPOSAL METHOD:** STORAGE, BULKING, AND/OR TRANSFER OFF SITE--NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)

**YEAR:** 2006  
**TSD ID:** CAD088504881  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** ORANGE  
**WASTE CATEGORY:** OTHER INORGANIC SOLID WASTE  
**AMOUNT DISPOSED (TONS):** 1.0000

**DISPOSAL METHOD:** NOT REPORTED

**YEAR:** 2006  
**TSD ID:** CAD088504881  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** ORANGE  
**WASTE CATEGORY:** OTHER INORGANIC SOLID WASTE  
**AMOUNT DISPOSED (TONS):** 0.1500

**DISPOSAL METHOD:** STORAGE, BULKING, AND/OR TRANSFER OFF SITE--NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)

CONTROL #: '17-3163
NOTIFIED: 5/1/2017 1
AGENCY: COUNTY OF SAN DIEGO ENVIRONMENTAL HEALTH
ADMINISTRATION: SAN DIEGO COUNTY HEALTH SERVICES DEPARTMENT
INCIDENT LOCATION: 1800 GOLDEN ACORN WAY - INDIAN RESERVATION
SAN DIEGO, CA 91906
INCIDENT COUNTY: SAN DIEGO COUNTY

SUBSTANCE INFORMATION
SUBSTANCE: WASTE COPPER ETCH SOLUTION
QUANTITY: 1
TYPE: CHEMICAL

INCIDENT DESCRIPTION
RP STATES, WHILE IN TRANSIT, A CONTAINER STARTED LEAKING DUE TO IMPROPER PACKAGING CAUSES WHICH
RELEASED 1 GALLON OF WASTE COPPER ETCH SOLUTION. THE RELEASE HAS BEEN CONTAINED AND STOPPED. NO
WATERWAYS OR STORM DRAINS IMPACTED. A CONTRACTOR WILL BE CONDUCTING CLEANUP OF THE RELEASE.

CONTAINED: YES
WATER INVOLVED / WATERWAY: NO / NOT REPORTED
DATE AND TIME: 5/1/2017
SITE: MERCHANT/BUSINESS
INJURIES: NO
FATALITIES: NO
EVACUATIONS: NO
CLEANUP BY: CONTRACTOR

**WASTE CATEGORY:** AQUEOUS SOLUTION WITH TOTAL ORGANIC RESIDUES 10 PERCENT OR MORE  
**AMOUNT DISPOSED (TONS):** 0.3  
**DISPOSAL METHOD:** STORAGE, BULKING, AND/OR TRANSFER OFF SITE—NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)  
**YEAR:** 2014  
**TSD ID:** CAD044429835  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** LOS ANGELES

**WASTE CATEGORY:** OFF-SPECIFICATION, AGED OR SURPLUS ORGANICS  
**AMOUNT DISPOSED (TONS):** 0.125  
**DISPOSAL METHOD:** STORAGE, BULKING, AND/OR TRANSFER OFF SITE—NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)  
**YEAR:** 2014  
**TSD ID:** NED981723513  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** UNKNOWN

**WASTE CATEGORY:** OTHER ORGANIC SOLIDS  
**AMOUNT DISPOSED (TONS):** 0.25  
**DISPOSAL METHOD:** INCINERATION—THERMAL DESTRUCTION OTHER THAN USE AS A FUEL  
**YEAR:** 2013  
**TSD ID:** UTD991301748  
**GENERATOR COUNTY:** SAN DIEGO  
**DISPOSAL COUNTY:** UNKNOWN

**WASTE CATEGORY:** OTHER ORGANIC SOLIDS  
**AMOUNT DISPOSED (TONS):** 0.175  
**DISPOSAL METHOD:** LANDFILL OR SURFACE IMPOUNDMENT THAT WILL BE CLOSED AS LANDFILL (TO INCLUDE ON-SITE TREATMENT AND/OR STABILIZATION)  
**YEAR:** 2013  
**TSD ID:** CAT000613893  
**GENERATOR COUNTY:** SAN DIEGO
Hazardous Waste Tanner Summary (HWTS)

DISPOSAL COUNTY: LOS ANGELES
WASTE CATEGORY: BLANK OR UNKNOWN
AMOUNT DISPOSED(TONS): 0.3250
DISPOSAL METHOD: STORAGE, BULKING, AND/OR TRANSFER OFF SITE--NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)
YEAR: 2013
TSD ID: CAT000613893
GENERATOR COUNTY: SAN DIEGO
DISPOSAL COUNTY: LOS ANGELES
WASTE CATEGORY: OTHER ORGANIC SOLIDS
AMOUNT DISPOSED(TONS): 2.4000
DISPOSAL METHOD: STORAGE, BULKING, AND/OR TRANSFER OFF SITE--NO TREATMENT/RECOVERY (H010-H129) OR (H131-H135)
YEAR: 2013
TSD ID: NVT330010000
GENERATOR COUNTY: SAN DIEGO
DISPOSAL COUNTY: UNKNOWN
WASTE CATEGORY: OTHER ORGANIC SOLIDS
AMOUNT DISPOSED(TONS): 0.2000
DISPOSAL METHOD: LANDFILL OR SURFACE IMPoundMENT THAT WILL BE CLOSED AS LANDFILL( TO INCLUDE ON-SITE TREATMENT AND/OR STABILIZATION)
YEAR: 2012
TSD ID: CAT000613893
GENERATOR COUNTY: SAN DIEGO
DISPOSAL COUNTY: LOS ANGELES
WASTE CATEGORY: BLANK OR UNKNOWN
AMOUNT DISPOSED(TONS): 0.2000

Back to Report Summary
THE ARMY ACQUIRED 7,111.748 ACRES FOR CAMP LOCKETT IN CAMPO, CALIFORNIA, APPROXIMATELY 40 DIRECTLY MILES EAST OF DOWNTOWN SAN DIEGO. IT COVERED 7,111.748 ACRES. MORE THAN 400 BUILDINGS, INCLUDING BARRACKS, ADMINISTRATIVE OFFICES, A HOSPITAL, WATER AND SEWER PLANTS, TWO GAS STATIONS, AND RECREATIONAL AREAS, WERE CONSTRUCTED. ON 30 SEPTEMBER 1946, THE WAR ASSETS ADMINISTRATION ASSUMED ACCOUNTABILITY FOR 1,096.168 ACRES WHICH WERE DISPOSED OF AS FOLLOWS: 113.0 ACRES IN LEASE TERMINATED ON 1 APRIL 1947; 671.21 IN FEE QUITCLAIMED TO THE COUNTY OF SAN DIEGO ON 7 JUNE 1950 (ACREAGE INCLUDES AN EXCEPTION OF 36.4 ACRES IN FEE QUITCLAIMED TO THE MOUNTAIN EMPIRE HIGH SCHOOL DISTRICT ON 15 SEPTEMBER 1949); AND 277.0 ACRES IN TWO LEASES, 31.228 ACRES IN FEE, AND 3.73 ACRES IN LESSER INTERESTS DISPOSED OF BY MEANS UNKNOWN. OVER 70 BUILDINGS REMAIN, MOST OF WHICH ARE IN USE BY PRIVATE PARTIES AND THE COUNTY OF SAN DIEGO FOR HOUSING, SCHOOL, COMMUNITY, OR COMMERCIAL PURPOSES. THIS PROPERTY IS KNOWN OR SUSPECTED TO CONTAIN MILITARY MUNITIONS AND EXPLOSIVES OF CONCERN (E.G., UNEXPLODED ORDNANCE) AND THEREFORE MAY PRESENT AN EXPLOSIVE HAZARD.

THE ARMY USED CAMP LOCKETT INITIALLY FOR CAVALRY TRAINING AND BORDER DEFENSE. THE ARMY ACQUIRED 7,111.748 ACRES FOR CAMP LOCKETT AS FOLLOWS: 702.438 ACRES IN FEE FROM PRIVATE PARTIES AND THE COUNTY OF SAN DIEGO BETWEEN 30 NOVEMBER AND 23 DECEMBER 1942.QUITCLAIMED TO THE COUNTY OF SAN DIEGO ON 7 JUNE 1950 (ACREAGE INCLUDES AN EXCEPTION OF 36.4 ACRES IN FEE QUITCLAIMED TO THE MOUNTAIN EMPIRE HIGH SCHOOL DISTRICT ON 15 SEPTEMBER 1949); AND 277.0 ACRES IN TWO LEASES, 31.228 ACRES IN FEE, AND 3.73 ACRES IN LESSER INTERESTS DISPOSED OF BY MEANS UNKNOWN. OVER 70 BUILDINGS REMAIN, MOST OF WHICH ARE IN USE BY PRIVATE PARTIES AND THE COUNTY OF SAN DIEGO FOR HOUSING, SCHOOL, COMMUNITY, OR COMMERCIAL PURPOSES.

</table>

The United States Environmental Protection Agency (EPA) modified the Aerometric Information Retrieval System (AIRS) to a database that exclusively tracks the compliance of stationary sources of air pollution with EPA regulations: the Air Facility Subsystem (AFS). Since this change in 2001, the management of the AIRS/AFS database was assigned to EPA's Office of Enforcement and Compliance Assurance.

The United States Environmental Protection Agency (EPA), in cooperation with the States, biennially collects information regarding the generation, management, and final disposition of hazardous wastes regulated under the Resource Conservation and Recovery Act of 1976 (RCRA), as amended. The Biennial Report captures detailed data on the generation of hazardous waste from large quantity generators and data on waste management practices from treatment, storage and disposal facilities. Currently, the EPA states that data collected between 1991 and 1997 was originally a part of the defunct Biennial Reporting System and is now incorporated into the RCRAInfo data system.

The U.S. Department of Justice ("the Department") provides this information as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments. The Department does not establish, implement, enforce, or certify compliance with clean-up or remediation standards for contaminated sites; the public should contact a state or local health department or environmental protection agency for that information.

The United States Environmental Protection Agency Docket data lists Civil Case Defendants, filing dates as far back as 1971, laws broken including section, violations that occurred, pollutants involved, penalties assessed and superfund awards by facility and location. Please refer to ICIS database as source of current data.

This database includes site locations where Engineering and/or Institutional Controls have been identified as part...
of a selected remedy for the site as defined by United States Environmental Protection Agency official remedy decision documents. A site listing does not indicate that the institutional and engineering controls are currently in place nor will be in place once the remedy is complete; it only indicates that the decision to include either of them in the remedy is documented as of the completed date of the document. Institutional controls are actions, such as legal controls, that help minimize the potential for human exposure to contamination by ensuring appropriate land or resource use. Engineering controls include caps, barriers, or other device engineering to prevent access, exposure, or continued migration of contamination.

ECHOR09 Enforcement and Compliance History Information
VERSION DATE: 08/26/17

The EPA's Enforcement and Compliance History Online (ECHO) database, provides compliance and enforcement information for facilities nationwide. This database includes facilities regulated as Clean Air Act stationary sources, Clean Water Act direct dischargers, Resource Conservation and Recovery Act hazardous waste handlers, Safe Drinking Water Act public water systems along with other data, such as Toxics Release Inventory releases.

ERNSCA Emergency Response Notification System
VERSION DATE: 04/29/18

This National Response Center database contains data on reported releases of oil, chemical, radiological, biological, and/or etiological discharges into the environment anywhere in the United States and its territories. The data comes from spill reports made to the U.S. Environmental Protection Agency, U.S. Coast Guard, the National Response Center and/or the U.S. Department of Transportation.

FRSCA Facility Registry System
VERSION DATE: 04/17/18

The United States Environmental Protection Agency's Office of Environmental Information (OEI) developed the Facility Registry System (FRS) as the centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. The Facility Registry System replaced the Facility Index System or FINDS database.

HMIRSR09 Hazardous Materials Incident Reporting System
VERSION DATE: 03/27/18

The HMIRS database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

ICIS Integrated Compliance Information System (formerly DOCKETS)
VERSION DATE: 09/23/17
ICIS is a case activity tracking and management system for civil, judicial, and administrative federal Environmental Protection Agency enforcement cases. ICIS contains information on federal administrative and federal judicial cases under the following environmental statutes: the Clean Air Act, the Clean Water Act, the Resource Conservation and Recovery Act, the Emergency Planning and Community Right-to-Know Act - Section 313, the Toxic Substances Control Act, the Federal Insecticide, Fungicide, and Rodenticide Act, the Comprehensive Environmental Response, Compensation, and Liability Act, the Safe Drinking Water Act, and the Marine Protection, Research, and Sanctuaries Act.

**ICISNPDES**
Integrated Compliance Information System National Pollutant Discharge Elimination System
VERSION DATE: 07/09/17

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States.

**LUCIS**
Land Use Control Information System
VERSION DATE: 09/01/06

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

**MLTS**
Material Licensing Tracking System
VERSION DATE: 06/29/17

MLTS is a list of approximately 8,100 sites which have or use radioactive materials subject to the United States Nuclear Regulatory Commission (NRC) licensing requirements.

**NPDESR09**
National Pollutant Discharge Elimination System
VERSION DATE: 04/01/07

Authorized by the Clean Water Act, the National Pollutant Discharge Elimination System (NPDES) permit program controls water pollution by regulating point sources that discharge pollutants into waters of the United States. The NPDES database was collected from December 2002 until April 2007. Refer to the PCS and/or ICIS-NPDES database as source of current data. This database includes permitted facilities located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

**PADS**
PCB Activity Database System
VERSION DATE: 07/18/17

PADS identifies generators, transporters, commercial storers and/or brokers and disposers of PCB’s who are
**Environmental Records Definitions - FEDERAL**

required to notify the EPA of such activities.

</tbody>
</table>

The Permit Compliance System is used in tracking enforcement status and permit compliance of facilities controlled by the National Pollutant Discharge Elimination System (NPDES) under the Clean Water Act and is maintained by the United States Environmental Protection Agency's Office of Compliance. PCS is designed to support the NPDES program at the state, regional, and national levels. This database includes permitted facilities located in EPA Region 9. This region includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa. PCS has been modernized, and no longer exists. National Pollutant Discharge Elimination System (ICIS-NPDES) data can now be found in Integrated Compliance Information System (ICIS).

The U.S. Environmental Protections Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs. This is a listing of SEMS sites with a lien on the property.

</tbody>
</table>

A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which United States Environmental Protection Agency has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties. This database contains those CERCLIS sites where the Lien on Property action is complete.

</table>

---

**SSTS**

The United States Environmental Protection Agency tracks information on pesticide establishments through the Section Seven Tracking System (SSTS). SSTS records the registration of new establishments and records pesticide production at each establishment. The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) requires that production of pesticides or devices be conducted in a registered pesticide-producing or device-producing establishment. ("Production" includes formulation, packaging, repackaging, and relabeling.)

**TRI**

The Toxics Release Inventory, provided by the United States Environmental Protection Agency, includes data on toxic chemical releases and waste management activities from certain industries as well as federal and tribal facilities. This inventory contains information about the types and amounts of toxic chemicals that are released each year to the air, water, and land as well as information on the quantities of toxic chemicals sent to other facilities for further waste management.

**TSCA**

The Toxic Substances Control Act (TSCA) was enacted in 1976 to ensure that chemicals manufactured, imported, processed, or distributed in commerce, or used or disposed of in the United States do not pose any unreasonable risks to human health or the environment. TSCA section 8(b) provides the United States Environmental Protection Agency authority to "compile, keep current, and publish a list of each chemical substance that is manufactured or processed in the United States." This TSCA Chemical Substance Inventory contains non-confidential information on the production amount of toxic chemicals from each manufacturer and importer site.

**RCRAGR09**

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities currently generating hazardous waste. EPA Region 9 includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.
The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities classified as non-generators. Non-Generators do not presently generate hazardous waste. EPA Region 9 includes the following states: Arizona, California, Hawaii, Nevada, and the territories of Guam and American Samoa.

This is a listing of FEMA owned underground and aboveground storage tank sites. For security reasons, address information is not released to the public according to the U.S. Department of Homeland Security.

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

This is a listing of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.
**Environmental Records Definitions - FEDERAL**

MRDS (Mineral Resource Data System) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS.

**www.geo-search.com** 888-396-0042
The open dump inventory was published by the United States Environmental Protection Agency. An “open dump” is defined as a facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under section 4004 of the Solid Waste Disposal Act (42 U.S.C. 6944) and which is not a facility for disposal of hazardous waste. This inventory has not been updated since June 1985.

**RCRAT**
**Resource Conservation & Recovery Act - Non-CORRACTS Treatment, Storage & Disposal Facilities**

VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities recognized as hazardous waste treatment, storage, and disposal sites (TSD).

**SEMS**
**Superfund Enterprise Management System**

VERSION DATE: 04/11/18

The U.S. Environmental Protections Agency's (EPA) Office of Solid Waste and Emergency Response, Office of Superfund Remediation and Technology Innovation (OSRTI), has implemented The Superfund Enterprise Management System (SEMS), formerly known as CERCLIS (Comprehensive Environmental Response, Compensation and Liability Information System) to track and report on clean-up and enforcement activities taking place at Superfund sites. SEMS represents a joint development and ongoing collaboration between Superfund's Remedial, Removal, Federal Facilities, Enforcement and Emergency Response programs.

**SEMSARCH**
**Superfund Enterprise Management System Archived Site Inventory**

VERSION DATE: 04/11/18

The Superfund Enterprise Management System Archive listing (SEMS-ARCHIVE) has replaced the CERCLIS NFRAP reporting system in 2015. This listing reflect sites that have been assessed and no further remediation is planned and is of no further interest under the Superfund program.

**SMCRA**
**Surface Mining Control and Reclamation Act Sites**

VERSION DATE: 08/25/17

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

The Legacy Management Office of the Department of Energy (DOE) manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The L.M. Office manages this database of sites registered under the Uranium Mill Tailings Control Act (UMTRCA).

This information originates from the National Atlas of the United States Federal Lands data, which includes lands owned or administered by the Federal government. Army DOD, Army Corps of Engineers DOD, Air Force DOD, Navy DOD and Marine DOD areas of 640 acres or more are included.

The Formerly Used Defense Sites (FUDS) inventory includes properties previously owned by or leased to the United States and under Secretary of Defense Jurisdiction, as well as Munitions Response Areas (MRAs). The remediation of these properties is the responsibility of the Department of Defense. This data is provided by the U.S. Army Corps of Engineers (USACE), the boundaries/polygon data are based on preliminary findings and not all properties currently have polygon data available.

Disclaimer: This data represents the results of data collection/processing for a specific USACE activity and is in no way to be considered comprehensive or to be used in any legal or official capacity as presented on this site. While the USACE has made a reasonable effort to insure the accuracy of the maps and associated data, it should be explicitly noted that USACE makes no warranty, representation or guaranty, either expressed or implied, as to the content, sequence, accuracy, timeliness or completeness of any of the data provided herein. For additional information on Formerly Used Defense Sites please contact the USACE Public Affairs Office at (202) 528-4285.

The U.S. DOE established the Formerly Utilized Sites Remedial Action Program (FUSRAP) in 1974 to remediate sites where radioactive contamination remained from the Manhattan Project and early U.S. Atomic Energy Commission (AEC) operations. The DOE Office of Legacy Management (LM) established long-term surveillance and maintenance (LTS&M) requirements for remediated FUSRAP sites. DOE evaluates the final site conditions of a remediated site on the basis of risk for different future uses. DOE then confirms that LTS&M requirements will maintain protectiveness.
This database includes RCRA Corrective Action facilities that are no longer regulated by the United States Environmental Protection Agency or do not meet other RCRA reporting requirements.

NMS
Former Military Nike Missile Sites
VERSION DATE: 12/01/84

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

NPL
National Priorities List
VERSION DATE: 04/11/18

This database includes United States Environmental Protection Agency (EPA) National Priorities List sites that fall under the EPA's Superfund program, established to fund the cleanup of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action.

PNPL
Proposed National Priorities List
VERSION DATE: 04/11/18

This database contains sites proposed to be included on the National Priorities List (NPL) in the Federal Register. The United States Environmental Protection Agency investigates these sites to determine if they may present long-term threats to public health or the environment.

RCRAC
Resource Conservation & Recovery Act - Corrective Action Facilities
VERSION DATE: 03/01/18

The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities with corrective action activity.
The Resource Conservation and Recovery Act (RCRA) gives EPA the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances. This listing refers to facilities subject to corrective actions.

These decision documents maintained by the United States Environmental Protection Agency describe the chosen remedy for NPL (Superfund) site remediation. They also include site history, site description, site characteristics, community participation, enforcement activities, past and present activities, contaminated media, the contaminants present, and scope and role of response action.
The California Department of Toxic Substance Control (DTSC) provides this listing of illegal drug laboratories. Pursuant to Section 25354.5 of the California Health and Safety Code, DTSC conducts emergency removal actions at clandestine drug labs at the request of State and local law enforcement agencies. DTSC’s contractors typically remove hazardous substances that may pose an immediate threat to public health and the environment while the enforcement officials are on scene. During the emergency removal actions, contractors remove and properly dispose of contaminated lab equipment, chemicals used to make the illegal drugs (usually methamphetamine), lab chemical wastes, and other grossly contaminated materials. DTSC does not perform additional assessment work beyond standard emergency removal actions and makes no further determination regarding the need for future cleanup work at the emergency removal location. The reported location information may or may not include the actual location of the illegal drug lab. The DTSC does not guarantee the accuracy of the address or location information or the condition of the location listed.

The California Hazardous Material Incident Report System database is provided by the California Emergency Management Agency. This database contains accidental or spill release information from reported hazardous material incidents since 1993.

The California Department of Toxic Substances Control (DTSC) maintains this listing of sites with deed restrictions. According to the DTSC, restricted land use indicates whether the site or area within the site has an environmental restriction recorded and/or other institutional control preventing certain types of land use or activities. The land use restrictions listed under the site management requirements are only an abbreviated summary of the land use restrictions, and may not encompass all restrictions and notification requirements placed on a property. For complete land use restriction information please contact the DTSC to review associated Land Use Restriction documents.

The Air Resources Board's Emissions Inventory Database contains criteria pollutant data and toxic data on facilities throughout the state of California for the 2012-2000 inventory years.
### Environmental Records Definitions - STATE (CA)

This data is prepared from information extracted from copies of hazardous waste manifests received each year by the Department of Toxic Substances Control. The Hazardous Waste Summary Report (Tanner Report) currently includes manifest data from the 1993 through the 2016 reporting years.

This database, provided by the California Environmental Protection Agency’s (CalEPA) Regulated Site Portal,
contains aboveground petroleum storage tank facilities originating from the California Environmental Reporting System (CERS). These facilities store petroleum in aboveground storage tanks with oversight by local agencies. As of January 1, 2008, Assembly Bill No. 1130 of the Aboveground Petroleum Storage Act (APSA) authorized the Certified Unified Program Agencies to implement and administer the requirements of the APSA. CalEPA Data Disclaimer: Information displayed in the portal is collected from separate agency databases and displayed unaltered. Information that is considered confidential, trade secret, or is otherwise protected by the agency that manages the database is not loaded into the portal. For more detail about information displayed in the portal, please visit the data source sites. Please refer to AST2007 database for aboveground storage tank information obtained from the California State Water Resources Control Board prior to 2008 APSA requirements.

**AST2007**
Aboveground Storage Tanks Prior to January 2008
VERSION DATE: 12/01/07

This database contains aboveground storage tank facilities registered with the California State Water Resources Control Board (SWRCB) between 2007 and 2003. Since 2006, tanks were required to contain a minimum (even as cumulative) of 1320 gallons to be in the program. As of January 1, 2008, the SWRCB no longer maintains a list of registered aboveground storage tanks, due to effective Assembly Bill No. 1130 (Laird) of the Aboveground Petroleum Storage Act (APSA). This Bill authorized the Certified Unified Program Agencies to implement and administer the requirements of the APSA. Please refer to ABST database as a current source for aboveground petroleum storage tank data.

**CLEANER**
Dry Cleaner Facilities
VERSION DATE: 06/20/18

This database, created by accessing the California Department of Toxic Substances Control’s (DTSC) Hazardous Waste Tracking System, includes dry cleaner facilities that have registered EPA identification numbers. These facilities are categorized with one of the following NAICS Codes: 81231 or 81232. This database may also include facilities other than dry cleaners who also register with these same NAICS Codes. Not all companies report their NAICS/SIC Codes to the DTSC and therefore this database may exclude registered dry cleaner facilities with incomplete classification information.

**DTSCHWT**
DTSC Registered Hazardous Waste Transporters
VERSION DATE: 04/30/18

The Department of Toxic Substances Control provides this list of Registered Hazardous Waste Transporters.

**HISTUST**
Historical Underground Storage Tanks
VERSION DATE: 12/31/87

The Hazardous Substance Storage Container Database is a historical list of Underground Storage Tank sites, compiled from tank survey and registration information collected at one time between 1984 and 1987 by the State Water Resources Control Board. The hazardous substances stored within these tanks includes, but not restricted to, petroleum products, industrial solvents, and other materials.
### MNES
**Mines Listing**
**VERSION DATE: 05/06/18**

This database includes mine site locations from the California Office of Mine Reclamation.

### MWMP
**California Medical Waste Management Program Facility List**
**VERSION DATE: 06/29/18**

To protect the public and the environment from potential infectious exposure to disease causing agents, the Medical Waste Management Program (MWMP), in the Environmental Management Branch of the California Department of Public Health, regulates the generation, handling, storage, treatment, and disposal of medical waste by providing oversight for the implementation of the Medical Waste Management Act (MWMA). The MWMP permits and inspects all medical waste off-site treatment facilities, medical waste transporters, and medical waste transfer stations.

### SLIC
**Spills, Leaks, Investigation & Cleanup Recovery Listing**
**VERSION DATE: 06/16/08**

These records are maintained by the California Regional Water Quality Control Board (RWQCB). This list includes contaminated sites that impact groundwater or have the potential to impact ground water. Please refer to CLEANUPSITES database as source of current data.

### SWEEPS
**Statewide Environmental Evaluation and Planning System**
**VERSION DATE: 10/01/94**

The Statewide Environmental Evaluation and Planning System (SWEEPS) contains a historical listing of active and inactive underground storage tank locations from the State Water Resources Control Board. The hazardous substances stored within these tanks includes, but not restricted to, petroleum products, industrial solvents, and other materials. Refer to CUPA listing for source of current data.

### USTCUPA
**Underground Storage Tanks**
**VERSION DATE: 05/06/18**

An underground storage tank is an individual tank or group of tanks that store hazardous substances. Underground storage tanks are completely or considerably below the ground surface. This database contains UST permit data submitted from the Certified Unified Program Agencies (CUPA) directly to the State Water Resources Control Board. CUPA's are local agencies that have been certified by the California EPA to implement state environmental programs within the local agency's jurisdiction.

### BF
**Brownfield Sites**
**VERSION DATE: 06/03/18**
This database includes Brownfield sites from the State Water Resources Control Board. These are sites that have gone through the Moratorium of Agreement (MOA) process.

CALSITES CALSITES Database
VERSION DATE: 05/01/04

This historical database was maintained by the Department of Toxic Substance Control for more than a decade. CALSITES contains information on Brownfield properties with confirmed or potential hazardous contamination. In 2006, DTSC introduced EnviroStor as the latest Brownfields site database.

CLEANUPSITES GeoTracker Cleanup Sites
VERSION DATE: 07/09/18

This GeoTracker Cleanup Sites database is maintained by the California Regional Water Quality Control Board (RWQCB). The database contains contaminated sites that impact groundwater or have the potential to impact ground water, including spills, investigations, cleanup recoveries and reported leaking underground storage tank incidents.

CORTESE Cortese List
VERSION DATE: 05/06/18

This active listing includes hazardous waste and substances sites designated by the State Water Resources Control Board, the Integrated Waste Board, and the Department of Toxic Substance Control. The Cortese List is utilized by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites.

DROP Listing of Certified Dropoff, Collection, and Community Service Programs
VERSION DATE: 04/30/18

Listing of Certified Dropoff, Collection, and Community Service Programs (non-buyback) operating under the state of California's Beverage Container Recycling Program. This list is maintained by the Department of Conservation.

ERAP Expedited Removal Action Program Sites
VERSION DATE: 04/23/18

The Expedited Remedial Action Program is a pilot project administered by the Department of Toxic Substances Control's Site Mitigation and Brownfields Reuse Program to promote the cleanup of up to 30 hazardous substance release sites. ERAP provides significant incentives for redevelopment of contaminated properties by promoting cleanups based on the planned land use, by providing a covenant not to sue, and by outlining a fair and equitable liability scheme.
**Environmental Records Definitions - STATE (CA)**

**HISTCORTESE**  
Historical Cortese List  
VERSION DATE: 11/02/02

This historical listing includes hazardous waste and substances sites designated by the State Water Resources Control Board, the Integrated Waste Board, and the Department of Toxic Substance Control. The Cortese List was utilized by the State, local agencies and developers to comply with the California Environmental Quality Act requirements in providing information about the location of hazardous materials release sites. See CACORTESE for an updated version of this database.

**LUST**  
Leaking Underground Storage Tanks  
VERSION DATE: 07/09/18

This database is maintained by the State Water Resources Control Board. LUST records contain an inventory of reported leaking underground storage tank incidents. Please refer to the CLEANUPSITES database as source of current data.

**NFA**  
No Further Action Determination  
VERSION DATE: 06/20/18

The NFA listing contains properties at which the Department of Toxic Substance Control has made a clear determination that the property does not pose a problem to the environment or to public health.

**NFE**  
Sites Needing Further Evaluation  
VERSION DATE: 06/20/18

The NFE listing contains properties that the Department of Toxic Substance Control suspects with possible contamination. These are unconfirmed contaminated properties that need further assessment.

**PROC**  
Listing of Certified Processors  
VERSION DATE: 05/15/18

Listing of Certified Processors that are operating under the state of California's Beverage Container Recycling Program. This list is maintained by the Department of Conservation.

**REF**  
Referred to Another Local or State Agency  
VERSION DATE: 06/21/18

The REF listing contains properties where contamination has not been confirmed and which were determined as not requiring direct Department of Toxic Substance Control Site Mitigation Program action or oversight. Accordingly, these sites have been referred to another state or local regulatory agency.

<td>Listing of Certified Recycling Centers that are operating under the state of California's Beverage Container Recycling Program. This list is maintained by the Department of Conservation.</td>
</tr>
<tr>
<td>VCP</td>
<td>Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.</td>
</tr>
<tr>
<td>WMUDS</td>
<td>The Waste Management Unit Database System tracks and inventories waste management units. CCR Title 27 contains criteria stating that Waste Management Units are classified according to their ability to contain wastes. Containment shall be determined by geology, hydrology, topography, climatology, and other factors relating to the ability of the Unit to protect water quality. Water Code Section 13273.1 requires that operators submit a water quality solid waste assessment test (SWAT) report to address leak status. The WMUDS was last updated by the State Water Resources control board in 2000.</td>
</tr>
<tr>
<td>ENVIROSTOR</td>
<td>The Department of Toxic Substances Control (DTSC) has developed the EnviroStor database system to evaluate and track sites with confirmed or potential contamination and sites where further investigation may be necessary. This EnviroStor database of cleanup sites contains the following: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. Sites where DTSC has made a &quot;No Action Required&quot; determination are not included in this database, as these sites had assessments that revealed no evidence of recognized environmental conditions in connection with the property.</td>
</tr>

**Environmental Records Definitions - STATE (CA)**

**ENVIROSTORPCA**  
EnviroStor Permitted and Corrective Action Sites  
VERSION DATE: 05/01/18

The Department of Toxic Substances Control (DTSC) has developed the EnviroStor database system to evaluate and track sites with confirmed or potential contamination and sites where further investigation may be necessary. This EnviroStor database contains detailed information on hazardous waste permitted and corrective action facilities. Investigation and cleanup activities at hazardous waste facilities (either Resource Conservation and Recovery Act (RCRA) or State-only) that either were eligible for a permit or received a permit are called "corrective action." These facilities treated stored, disposed and/or transferred hazardous waste.

**TOXPITS**  
Toxic Pits Cleanup Act Sites  
VERSION DATE: 07/01/95

Toxic Pits are sites with possible contamination of hazardous substances where cleanup is necessary. This listing is no longer updated by the State Water Resources Control Board.
