To whom it may concern,

I would like to go on record as a resident of Boulevard, CA, that I am against the proposed wind turbine project.

I12-1

I have many concerns to include, the resident's health, the depletion of wildlife, the aesthetics of the natural surroundings, the water use from the local area, the noise pollution, and the decrease in property values.

I understand that it will be easier and more cost effective for these to built closer to the roads and residents, but I think they need to be moved out to more deserted areas regardless of the cost to whoever is responsible for the construction of the project. The wind turbines are very unattractive and I think just really make our community ugly. I don't think any one of you would want something this big and ugly being built in your neighborhood, just think about what it's going to be like to try and sell your property after someone puts a huge wind turbine in your back yard.

I12-2

Over the past four years and since the last installation of turbines went in McCain Valley, our natural wildlife has decreased. We no longer see any deer at all, and virtually nothing else than some crows, bluebirds, a coyote or two, when we used to see turkeys, eagles, road runners, etc.

I12-3

I have heard reports of many health related issues in regards to these turbines and this is also a concern for me and my family and friends.

I12-4

I ask that you please take this into consideration in your future planning.

I12-5

V/R,

Janet Ryan
