---

Dear Ms Harris,

My wife and I are long time residents of Boulevard and live on the north end of Ribbonwood Rd. Our home is currently surrounded on three sides by wind turbines, Kumeyaay turbines to the West and the Tule Wind project to the East and North. We, as well as our neighbors, experience the impacts from these turbines daily. Other than the ruination of our scenic view we also deal with the "whooshing" sound that can be extremely loud and continue 24/7. Terra-Gen's proposed 90 new 4.2 MW turbines (Campo Wind & Torrey Wind) will bring turbines even closer to our home and, if the project is approved as planned, these turbines will be nearly twice the size of the current ones and create more noise. The current setback restriction is extremely inadequate considering the size of the turbines.

I15-1

I15-2

It feels as if the wind generation companies are attempting to squeeze the homeowners out. We are retired seniors and unfortunately with the negative impact that these wind projects have on property values we are stuck with no way to relocate if the conditions become intolerable.

I15-3

Please protect our home (and our neighbor's) by not allowing turbines any closer or larger than the existing ones we are currently dealing with. Please don't support the Boulder Brush Gen-Tie project that will facilitate the construction of the proposed Campo and Torrey Wind projects. Wind generation projects can co-exist with residents however they must be held to restrictions that will mitigate the negative effects on home owners. These restrictions may mean that the wind generation companies have to settle for reduced revenues from smaller overall projects or relocate the projects to be further away from residents but at least people will not be forced from their homes.

I15-4

I15-5

Thank you.

Sincerely,  
Robert and Marie Morgan  
2912 Ribbonwood Rd
