---

Is a disguise of friendliness without care about the HEALTH of this neighborhood of Ribbonwood Rd., Boulevard, Ca 91905.. after a tsunami of attempts , changing project names, hearings, serve to exhaust our neighborhood's will to fight back, I'm surprise on the another hearing on January 24,2020. The EIR do not represent the true pictures of actual happening here in ribbonwood road,Boulevard, -several cases of cancers after wind turbin been installed, not to mention imsonia, anxiety and for some, depression.. we have an acoustic expert showed us how the invisible frequency of waves penetrate our bodies cause the symptoms described above. I beg your understanding of our true situation here. The County should have some one stay here for several days and try to imagine the damage wind turbin can do to us.

I was a green hotel developer developing America's first LEED Gold rated hotel-Gaia Napa Valley Hotel, now a Double Tree Hotel. I suppose to support many green energy resource.but not the project like this that destroys human health. If county end up passing the so called EIR. A.law suit will followed.

Thank you for your attention.

Truly yours,

Wen Chang

2758 Ribbonwood Road,

Boulevard, California

91905.
