Susan,

I am writting to you in Hope's that my opinion and objections will be considered regarding this energy project.

I have lived in Boukevard since May 2006. I enjoy the serenity and views. I fear that these wind generators will be devastating to the locals. We have already experienced unexplained health issues, but we have limited water resources. We have already experienced blades shattering and fires from exploding generators. We have been lucky so far with the dangers these wind generators create to humans, environment and wildlife.

I really oppose these Ebert projects some of the reasons listed above. We are a rural community and these projects if allowed will also diminish my property value and make my investments worthless.

Please consider my objections for a No vote on this matter. Please feel free to contact me if you have any questions or concerns.

Respectfully,

Don Lumb
