---

I do not approve of this project . I do not feel it is deemed necessary. As a homeowner on ribbonwood rd I am already surrounded by wind generators on the east and north and west. This project is basically in my front yard. The sound and vibrations from the turbines is bad and causes my sleepless night for my family. Our health has been affected as well. Our view of the beautiful landscape is ruined and my property value is greatly affected. More of the same would lead to a financial disaster for us . We wouldn't able to sell or live in the manner we wish to when we originally purchased our home. Now that all is destroyed. By pure greed and disregard for human life. How would you like this in your back yard? I appose this project with every fiber of my being. Yours truly unwilling Leslie Mauris
