Subject: Fwd: Miller Valley Mitigation Project next to Campo Wind Project

I am forwarding to you the special public notice for the Miller Valley Ranch Mitigation Bank, for your information concerning the Camp Wind Project. The bank is directly adjacent to the Campo Indian Reservation and would be negatively impacted severely by the construction of the wind mills. The status of the application is that it has been approved by the U.S Fish and Wildlife Service the Army Corp of Engrs. and the California Department of Fish and Wildlife. The language and everything has been approved and they are in the process of signing off on it per Cynthia Elhed, contact for the project. There are approximately 480 acres involved.

I31-1

Please consider the impact of wind mills on this mitigation bank. Thank you.

Carol Frederick
619-977-7390.
