Please add my name as a person who opposes the Campo wind and Boulder Brush projects. They will harm our way of life in the back country and jeopardize our health and water supplies. We are all on well water here and the volume of water needed to complete these projects will most certainly create a water supply problem. In addition the wildlife are also going to be endangered. Not only the Raptures and birds but all wildlife here in the area. Please do not approve these awful, ugly, dangerous projects!
