Cc: John Reddan
Subject: Development in McCain Valley (Campo Wind Project)
Date: Sunday, January 19, 2020 12:21:00 PM

Ms. Harris,

As a property owner in McCain Valley I am greatly saddened by the development that has been done to date in the greater McCain Valley area. The impact to the quality of life and the environment has been substantial. Further development of large scale projects detract from the valley and also have large scale impact on environment through road construction (in areas where there were none). I significant incensed by the construction of large scale items that exceed what I would be permitted on my land by a factor of at least 10X in size. I strongly believe that power should be produced near where it is consumed, instead of impacting those of us who chose to persue a more rural extistence. I4-1

Best Regards,
John Reddan
