RE: Boulder Brush / Campo Wind DEIR, PDS2019-ER-19-16-001, PDS2019-MUP-19-002

Hello Susan and Nicholas,

Please include the attached comments / documents into the formal public record for the Boulder Brush / Campo Wind DEIR. Appendix A confirms that they were not included or addressed in the DEIR despite the fact that they were provided to Bronwyn Brown, the previous PDS project manager on July 3, 2019, as documented below.

O1-1
O1-2

Please confirm receipt and that these comments/ documents will be included in the formal record for the Boulder Brush / Campo Wind DEIR.

O1-3

Regards,
Donna Tisdale, President
Backcountry Against Dumps
619-766-4170

RE: CAMPO WIND OPPOSITION DOCUMENTS & WIND TURBINE IMPACT SURVEYS COLLECTED AND SUBMITTED BY BACKCOUNTRY AGAINST DUMPS (BAD):

Campo tribal leadership, the Bureau of Indian Affairs, the Bureau of Land Management, the Department of Interior, San Diego County, Imperial County, the CPUC, the State Lands Commission and others were all negligent when they authorized the construction of Kumeyaay Wind, Tule Wind, and Ocotillo Wind turbines far too close to homes and other sensitive receptors.

O1-4

Now that the damage has been, and continues to be inflicted, impacted residents have been treated like the enemy when they complain, try to seek abatement / resolution, and try to gain some form of relief and redress from the ongoing torment that these massive turbines

O1-5

inflict on them, within their own homes and properties, whose value has been significantly reduced, making it harder to leave and move somewhere away from turbines. It is even harder for local tribal members to make a move to safer ground.

O1-6

Please include the attached opposition documents in the formal record for Terra-Gen's Campo Wind / Boulder Brush DEIS:

O1-7

1. Petition with 45 signatures opposing Terra-Gen's Campo Wind, Boulder Brush Gen-Tie and Torrey Wind projects that are really one big connected project.
2. Six signed Campo Wind opposition letters.
3. 11 completed Wind Turbine neighbor surveys dated 6-27-19, listing symptoms and other issues related to existing wind turbines.
4. 38 completed Wind Turbine neighbor surveys dated March 2 to June 6, 2019

O1-7a

O1-7b

O1-7c

O1-7d

People are really suffering. Someone needs to step up, take responsibility, and do something.

Regards,
Donna Tisdale, President
Backcountry Against Dumps
PO Box 1275
Boulevard, CA 91905
619-766-4170

Petition to oppose Terra-Gen's 90 new 586 ft tall 4.2 MW turbines and new high-voltage line planned for about 4,500 acres of Campo Reservation (252 MW Campo Wind) and private ranch land in Boulevard (126 MW Torrey Wind) & Boulder Brush Gen-tie line. It is one big connected project--not 3 separate projects! Tribal vote to approve lease was allegedly illegal--not properly noticed for vote. Most jobs will go to out-of-area contractors and labor—not locals. (Circulated by non-profit Backcountry Against Dumps as a public service Return signed petitions to Donna Tisdale via, PO Box 1275, Boulevard, CA 91905 or tisdale.donna@gmail.com; 619-766-4170)

Petition summary and background	This petition is directed at decision makers at the Campo Band, Bureau of Indian Affairs, Dept. Of Interior, San Diego County, California Public Utilities Commission, elected representatives, and the general public who may think turbines are benign.
Action petitioned for	We strongly urge our leaders to act now to deny Terra-Gen's massive wind turbine projects based on significant, cumulative and disproportionate adverse impacts to: public health and safety, sleep deprivation & stress-related illnesses; noise, low-frequency noise, infrasound & vibrations; <u>increased fire risk & insurance costs</u> ; loss of scenic landscapes & property values; light and electrical pollution; well water; wildlife; pets and livestock & habit. Turbines are planned far too close to homes & roads. Existing turbines around the world generate complaints related to the impacts stated above, basically making homes toxic and families sick. Homes have been abandoned and bought out. <u>Courts and public agencies are finally starting to recognize that industrial wind turbines do impact health and property values. STOP THE TURBINES!</u>

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 57-2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☒ noise / vibrations
- ☐ low rumbling, whooshing, grinding sounds
- ☒ sleep disruption / being startled awake
- ☒ chronic fatigue / loss of energy
- ☐ headache/migraines
- ☒ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☒ concentration/memory issues
- ☒ irritability, feeling on edge, or jittery
- ☒ unexplained panic attacks/anxiety
- ☒ ringing or buzzing in the ears
- ☐ pressure in chest
- ☒ sinus or breathing problems / asthma
- ☒ heart fluttering, racing, or heart attack
- ☒ increased blood pressure or blood sugar
- ☒ depression or unusual mood swings
- ☒ visual blurring or eye pain
- ☐ unexplained rashes
- ☐ joint and muscle pain
- ☒ cancer or benign tumors. Type of cancer? Prostate
- ☒ electrical interference at home /office
- ☐ disrupted TV, cell, satellite service
- ☐ increased static electricity
- ☐ blade shadow flicker / strobe effect
- ☐ flashing night lights
- ☐ other issues not listed here

Symptoms seem worse when:

- ☒ inside home / office
- ☒ outside
- ☐ distracted by motion of turbines
- ☒ changes in air pressure / wind direction

Do symptoms get better or go away when you leave the area for days or weeks and then return when you get back?

☒ Yes ☐ No

In your opinion, are existing turbines too close to homes /offices?

☒ Yes ☐ No

Do the turbines make you want to move?

☒ Yes ☐ No

Have you filed any complaints over the turbines?

☒ Yes ☐ No

If yes, have you been contacted by San Diego County, BLM, Bureau of Indian Affairs, health officers, or wind turbine owners asking about or investigating your complaints: ☐ Yes ☐ No

If yes, was any help / investigations (noise/electrical/health) offered or provided? ☐ Yes ☒ No

I declare that this information is true to the best of my knowledge:

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 57-2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☒ noise / vibrations
- ☐ low rumbling, whooshing, grinding sounds
- ☐ sleep disruption / being startled awake
- ☐ chronic fatigue / loss of energy
- ☐ headache/migraines
- ☐ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☒ concentration/memory issues
- ☐ irritability, feeling on edge, or jittery
- ☐ unexplained panic attacks/anxiety
- ☒ ringing or buzzing in the ears
- ☐ pressure in chest
- ☐ sinus or breathing problems / asthma
- ☐ heart fluttering, racing, or heart attack
- ☐ increased blood pressure or blood sugar
- ☐ depression or unusual mood swings
- ☐ visual blurring or eye pain
- ☐ unexplained rashes
- ☒ joint and muscle pain

Cont.

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 57-2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☒ noise / vibrations
- ☒ low rumbling, whooshing, grinding sounds
- ☒ sleep disruption / being startled awake
- ☒ chronic fatigue / loss of energy
- ☒ headache/migraines
- ☐ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☒ concentration/memory issues
- ☒ irritability, feeling on edge, or jittery
- ☒ unexplained panic attacks/anxiety
- ☒ ringing or buzzing in the ears
- ☒ pressure in chest
- ☐ sinus or breathing problems / asthma
- ☒ heart fluttering, racing, or heart attack
- ☒ increased blood pressure or blood sugar
- ☒ depression or unusual mood swings
- ☒ visual blurring or eye pain
- ☐ unexplained rashes
- ☐ joint and muscle pain
- ☐ cancer or benign tumors. Type of cancer?

- ☒ electrical interference at home / office
- ☒ disrupted TV cell, satellite service
- ☒ increased static electricity
- ☒ blade shadow flicker / strobe effect
- ☒ flashing night lights
- ☐ other issues not listed here

Symptoms seem worse when:

- ☒ inside home / office
- ☒ outside
- ☒ distracted by motion of turbines
- ☒ changes in air pressure / wind direction

Do symptoms get better or go away when you leave the area for days or weeks and then return when you get back?

☒ Yes ☐ No

In your opinion, are existing turbines too close to homes / offices?

☒ Yes ☐ No

Do the turbines make you want to move?

☒ Yes ☐ No

Have you filed any complaints over the turbines?

☒ Yes ☐ No

If yes, have you been contacted by San Diego County, BLM, Bureau of Indian Affairs, health officers, or wind turbine owners asking about or investigating your complaints: ☒ Yes ☐ No

NOT COUNTY + NOT BLM
If yes, was any help / investigations (noise/electrical/health) offered or provided?

Yes ☒ No ☐ OFFERED TO PUT IN CELL EXTERNAL AND PUT BLINDS IN THE WINDOWS
I declare that this information is true to the best of my knowledge:

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 57-2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☒ noise / vibrations
- ☐ low rumbling, whooshing, grinding sounds
- ☒ sleep disruption / being startled awake
- ☐ chronic fatigue / loss of energy
- ☐ headache/migraines
- ☐ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☐ concentration/memory issues
- ☐ irritability, feeling on edge, or jittery
- ☐ unexplained panic attacks/anxiety
- ☐ ringing or buzzing in the ears
- ☐ pressure in chest
- ☐ sinus or breathing problems / asthma
- ☐ heart fluttering, racing, or heart attack
- ☐ increased blood pressure or blood sugar
- ☐ depression or unusual mood swings
- ☐ visual blurring or eye pain
- ☐ unexplained rashes
- ☒ joint and muscle pain
- ☐ cancer or benign tumors. Type of cancer?

- ☐ electrical interference at home / office
- ☐ disrupted TV, cell, satellite service
- ☐ increased static electricity
- ☐ blade shadow flicker / strobe effect
- ☐ flashing night lights
- ☐ other issues not listed here

Symptoms seem worse when:

- ☐ inside home / office
- ☐ outside
- ☐ distracted by motion of turbines
- ☒ changes in air pressure / wind direction

Do symptoms get better or go away when you leave the area for days or weeks and then return when you get back?

☒ Yes ☐ No

In your opinion, are existing turbines too close to homes / offices?

☒ Yes ☐ No

Do the turbines make you want to move?

☒ Yes ☐ No

Have you filed any complaints over the turbines?

☐ Yes ☒ No

If yes, have you been contacted by San Diego County, BLM, Bureau of Indian Affairs, health officers, or wind turbine owners asking about or investigating your complaints: ☐ Yes ☐ No

If yes, was any help / investigations (noise/electrical/health) offered or provided?
☐ Yes ☐ No

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 57-2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☐ noise / vibrations
- ☐ low rumbling, whooshing, grinding sounds
- ☒ sleep disruption / being startled awake
- ☒ chronic fatigue / loss of energy
- ☐ headache/migraines
- ☐ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☐ concentration/memory issues
- ☐ irritability, feeling on edge, or jittery
- ☐ unexplained panic attacks/anxiety
- ☒ ringing or buzzing in the ears
- ☐ pressure in chest
- ☐ sinus or breathing problems / asthma
- ☐ heart fluttering, racing, or heart attack
- ☐ increased blood pressure or blood sugar
- ☐ depression or unusual mood swings
- ☐ visual blurring or eye pain
- ☐ unexplained rashes
- ☐ joint and muscle pain
- ☐ cancer or benign tumors. Type of cancer?

- ☐ electrical interference at home / office
- ☐ disrupted TV, cell, satellite service
- ☐ increased static electricity
- ☒ blade shadow flicker / strobe effect
- ☒ flashing night lights
- ☒ other issues not listed here

Symptoms seem worse when:

- ☐ inside home / office
- ☒ outside
- ☐ distracted by motion of turbines
- ☒ changes in air pressure (wind direction)

Do symptoms get better or go away when you leave the area for days or weeks and then return when you get back?

☒ Yes ☐ No

In your opinion, are existing turbines too close to homes/offices?

☒ Yes ☐ No

Do the turbines make you want to move?

☒ Yes ☐ No

Have you filed any complaints over the turbines?

☒ Yes ☐ No

If yes, have you been contacted by San Diego County, BLM, Bureau of Indian Affairs, health officers, or wind turbine owners asking about or investigating your complaints: ☐ Yes ☒ No

If yes, was any help / investigations (noise/electrical/health) offered or provided?

☒ Yes ☐ No

I declare that this information is true to the best of my knowledge:

O1-8

I have Family & Friends on manzanita Desert with cancer caused by windmills. She never turns off her T.V. Because of noise. I heard Campo claims no Disturbance, No one from Campo lives near windmills please they put them next to manzanita Boulevard area not near Residence on Campo. Also I feel that putting them in McAdams valley is conflict of interest. State park land is suppose to be protecting land not utilizing for Profit. These things wake me up 3 in the morning everyday and I cant sleep until 5:30 because of windmills

they need to investigate

01-10

I suffered a mild heart Attack from
the turbines I have anxiety sleep issue
stomach issues ringing ears etc
etc etc etc etc etc etc etc

O1-10a

O1-10b

The turbine people did not do their
due diligence to see how close
humans should live to these
turbines. They are negligent &
will have class action suits brought
against them if they do not address
these problems.

O1-10c

O1-10d

The BIA federal govt will
also be charged because they
did not protect the tribal
people from these (harmful)
wind turbines—

ABOUT 1.52 MILES FROM TULE WIND
ABOUT 1.76 MILES FROM KUMEYAAY WIND

01-11

I would like to express my concerns about the decrease of our property value due to the existing turbines and the proposed turbines. I am also concerned about the traffic that will increase on our road. There will need to be modifications made to our existing road due to the fact that it is dirt. We have received no information about what the plan to do with the road and what impact it will have on the residents.

O1-11a

O1-11b

2019 WIND TURBINE NEIGHBOR SURVEY

I am a resident of the Boulevard area in rural Eastern San Diego County. In late 2005, the 25-2MW Gamesa turbines started operation at Kumeyaay Wind on the Campo Reservation. In late 2017, the 2.3 MW GE turbines started operation nearby, at Iberdrola's Tule Wind, with 52 of the 57 turbines installed on previously protected public BLM land in McCain Valley and 5 installed on private land owned by Hamann Company related entities. Now, Terra-Gen plans about 90 new 4.2 MW turbines on the Campo Reservation and private ranch land owned by GM Gabrych Family Limited Partnership.

Since the existing wind turbines started operation, or since I moved into the area, I have noticed the following issues that either started or got worse for myself and/or my family members:

Symptoms and other issues/impacts are checked/circled below:

- ☐ noise / vibrations
- ☒ low rumbling, whooshing, grinding sounds
- ☐ sleep disruption / being startled awake
- ☐ chronic fatigue / loss of energy
- ☐ headache/migraines
- ☐ vertigo (spinning or moving sensation)
- ☐ nausea or stomach pain
- ☒ concentration/memory issues
- ☐ irritability, feeling on edge, or jittery
- ☐ unexplained panic attacks/anxiety
- ☒ ringing or buzzing in the ears
- ☐ pressure in chest
- ☐ sinus or breathing problems / asthma
- ☐ heart fluttering, racing, or heart attack
- ☒ increased blood pressure or blood sugar
- ☒ depression or unusual mood swings
- ☐ visual blurring or eye pain
- ☒ unexplained rashes
- ☒ joint and muscle pain
- ☐ cancer or benign tumors. Type of cancer?
- ☒ electrical interference at home / office
- ☒ disrupted TV, cell, satellite service
- ☒ increased static electricity
- ☒ blade shadow flicker / strobe effect
- ☒ flashing night lights
- ☒ other issues not listed here

Symptoms seem worse when:

- ☐ inside home / office
- ☒ outside
- ☐ distracted by motion of turbines

ABOUT 3 MILES TO KUMEYAAY WIND
ABOUT 2.5 MILES TO TULE WIND

The ringing in ears is very pronounced when I am at home and not noticeable when I am not.

O1-13a

Migraines are not new and I can't comment on whether they are worse, since they always feel worse, but the last 3 years or so, spending time outside can trigger them when it didn't before.

O1-13b

The turbines' shadows on the freeway can cause anxiety attacks while driving. I have had several scares when the shadows are especially defined.

O1-13c

As for eyes & fatigue, these are both recent. The edges of my eyes sometimes cause discomfort and I am tired more often. These I don't know the cause for.

O1-13d

I can rarely call my father's cell when he is at home. It always goes straight to voicemail and I have to call the home phone.

ABOUT 8.2 MILES TO TULE WIND
ABOUT 8.96 MILES TO KUMEYAAY

01-15

I was cancer free for 32 years, but it seems odd that after so many years cancer reappeared after ticklines came to our communities of Jacumba and Boulevard. Cancer has been rising in our communities. When I am at home I have a non-stop ringing in my ears but when I am away from the mountain area the ringing stops.

ABOUT 5,228 FT FROM
KUMEYAAY WIND

O1-17

I don't mind windmill farms; I truly believe we need to develop alternative, clean energy. BUT please don't pepper our private land and neighborhoods with ~~clumps~~ clumps of mills (willy-nilly) here and there in our backyards. . . These also ruin our views (a reason for moving way out here), the landscape. PLUS they kill lots of birds! I consider my land as a sanctuary for birds.

Please do not put up these giant windmills in our backyards!

Sincerely,

Helene P. Fisher
a home-owner/tax payer
in Boulevard, CA.
