

I15 Robert and Marie Morgan

- I15-1** The comment provides an introductory statement to the letter, noting that the authors are longtime residents of the area and that their home is currently surrounded on three sides by wind turbines, and they experience the impacts of these existing turbines daily. The comment does not raise an issue related to the adequacy of the analysis contained within the Draft Environmental Impact Report (EIR); therefore, no further response is required.
- I15-2** The comment states the turbines ruin their scenic view and they also deal with the “whooshing” sound that can be extremely loud, operating over a 24/7 time period. The comment also states that the proposed Campo Wind Project with Boulder Brush Facilities (Project) and Torrey Wind would bring the turbines even closer to the authors’ home, which, if approved, would result in more noise within the area. The comment concludes with the statement that the current setback restriction is extremely inadequate. In response, the noise impacts of the Project are addressed in Chapter 2.6, Noise, and Appendix G, Acoustical Analysis Report, of the Draft EIR. Also please refer to Global Response GR-4, Noise. The comment does not provide any information that would necessitate revisions to the noise impact analysis contained within the Draft EIR.
- I15-3** The comment states that, as retired seniors, the author will have no way to relocate if the conditions become intolerable, and that they are stuck with the negative impact on property values as a result of the wind turbine projects. In regard to property values, please refer to Global Response GR-1, Socioeconomic Impacts. The comment does not raise an issue related to the adequacy of the analysis contained within the Draft EIR; therefore, no further response is required.
- I15-4** The County of San Diego acknowledges the comment and notes that it expresses opposition to the Project but does not raise any issue concerning the adequacy of the Draft EIR. No further response is required.
- I15-5** The comment provides concluding remarks and suggests that wind power generation companies should reduce the size of their projects or relocate them so as to minimize negative effects on homeowners. The comment does not raise any issue concerning the adequacy of the Draft EIR; therefore, no further response is required.

INTENTIONALLY LEFT BLANK
