

I3 Leslie Mauris

- I3-1** The comment states the commenter's opposition to the Campo Wind Project with Boulder Brush Facilities (Project) and states that their home is already surrounded by wind turbines. The comment does not raise an issue with the adequacy of the analysis contained within the Draft Environmental Impact Report (EIR); therefore, no further response is required.
- I3-2** The comment expresses concern regarding sound and vibrations from the turbines. The comment does not raise an issue with the adequacy of the analysis contained within the Draft EIR. For a discussion of impacts regarding noise and vibration, refer to Chapter 2.6, Noise, of the Draft EIR. Please also refer to Global Response GR-4, Noise.
- I3-3** The comment states that the wind turbines cause sleepless nights for their family and damage their health. The comment does not raise an issue with the adequacy of the analysis contained within the Draft EIR. Please refer to Global Response GR-2, Public Health.
- I3-4** The comment states their views of the beautiful landscape have been ruined and their property value is greatly affected. The comment further states more of the same would be a financial disaster. The concluding remarks to the comment also provide a statement of opposition to the Project. This comment does not raise a specific issue related to the adequacy of the analysis contained within the Draft EIR. However, please refer to the analysis of impacts to visual character/quality and scenic vistas in Chapter 2.1, Aesthetics, of the Draft EIR. Please also refer to Global Response GR-8, Visual Impacts. Regarding property values, please refer to Global Response GR-1, Socioeconomic Impacts.
