

### I42 Kristine Alessio

- I42-1** The comment recognizes the need for clean energy and to move on from fossil fuels but states the Campo Wind Project with Boulder Brush Facilities is in the wrong place due to the environmental impacts to the community, including devaluation of property and the loss of water, which are not mitigable. In regard to property values, please refer to Global Response GR-1, Socioeconomic Impacts. Regarding water impacts please refer Chapter 3.1.5, Hydrology and Water Quality, and the Groundwater Resources Evaluation (Appendix J-1) of the Draft EIR. Please also refer to Global Response GR-6, Groundwater.
