I43  Michael Warburton and Sandra Darwash

I43-1  The comment states that the author is concerned by the potential impacts the Campo Wind Project with Boulder Brush Facilities (Project) will have on them, especially in consideration of the conditions and effects of existing turbines in the area. The comment does not specifically raise an issue regarding the adequacy of the analysis contained in the Draft Environmental Impact Report (EIR); therefore, no further response is required.

I43-2  The comment states that the author lives only hundreds of feet from the Campo Band of Diegueño Mission Indians Reservation. Further, the wind continually whips through the area from the west, and if there was a fire they would be directly in the path. For a discussion of impacts regarding wildfires and wildfire hazards, please refer to Chapter 2.5, Hazards and Hazardous Materials, and Chapter 2.9, Wildfire, of the Draft EIR. Please also see Global Response GR-7, Fire Protection Services and Wildfire. The comment does not raise a specific issue regarding the adequacy of the analysis of wildfire hazards contained within the Draft EIR; therefore, no further response is required.

I43-3  The comment states that the effects of noise and other documented issues with turbines are a concern. For a discussion of impacts related to noise, refer to Chapter 2.6, Noise, and the Acoustical Analysis Report (Appendix G) of the Draft EIR. Please refer also to Global Response GR-4, Noise. The comment does not raise an issue regarding the adequacy of the analysis contained within the Draft EIR; therefore, no further response is required.

I43-4  The comment states the loss of property value is a concern. Please refer to Global Response GR-1, Socioeconomic Impacts.

I43-5  The comment states that “It would make sense that locations are chosen based on the proximity to dwellings and ruled out especially when dwellings exist directly West/East of the turbines within XX distance, if anything to avoid fire threat to people and property.” For a discussion of impacts regarding wildfires and wildfire hazards, please refer to Chapter 2.5 and Chapter 2.9 of the Draft EIR. Please also see Global Response GR-7. This statement does not raise an issue related to the adequacy of the analysis contained within the Draft EIR; therefore, no further response is required.

I43-6  The comment provides concluding remarks. The comment does not raise any issues concerning the adequacy of the analysis contained in the Draft EIR; therefore, no further response is required.
