Susan

I would like to express my concern about the JVR Energy Park that is potentially being considered for the Jacumba area in east county.

As a home owner in Jacumba this project would overwhelm the area and make it virtually uninhabitable. The financial impact on the existing landowners as well as the many health issues would totally decimate the economy of the area and make it uninhabitable as well as an eyesore on the beautiful natural landscape.

For way to long the Jacumba area has been the dumping ground for sex offenders. To add this to the area is an abomination and a slap in the face to the people who live in Jacumba!!!! This project would be literally within 50 yards of my house!!!! Totally unacceptable and goes against common sense. If this was an uninhabited area maybe it would be a different story but to take an area that is already inhabited and to make it into a solar farm is out of the question. The long standing history of the area as well as the Jacumba Hot Springs Spa's legacy, would make such a plan unthinkable.

There are other places that are available for a project such as this and to put this in Jacumba would be an embarrassment to the county!!!

Please reconsider this plan for this area as it would ruin my home and neighborhood as well as the aesthetics of the beautiful countryside.

I know I am just a single person but the County Planning Dept needs to reconsider this plan.

Thanks for your time!!!!
