Subject: JVR Energy Park Extension
Date: Wednesday, November 18, 2020 1:54:36 PM

Good Afternoon!

I think I might have sent this email the wrong email address the other day and now Nicholas is on vacation until the comment period ends, November 23rd.

I just wanted to respectfully request a 15 day extension due to the extenuating circumstances regarding our community, and SD County raising its Tier Level which is restricting our communities access to comment and read the EIR. Jacumba Hot Springs is a rural community, with limited internet access, and a community that skews elderly. Most residents are active users at the library, but since COVID, library hours have been limited and this is really the only place the residents can review the EIR and make appropriate comments. Also due to the increased risk level off COVID they have limited their time in public places during this pandemic, and have trouble accessing the library when it is not busy/they feel safe.

I also want to note many residents here have no internet at all, or have very limited ability on it. The physical print out is really their only way to review it adequately.

I hope under these extenuating circumstances you can grant us a small 15 day extension to give the residents a few more days to have adequate time to review the document (which is over 1000 pages).

Respectfully,
Jeff Osborne
