Dear Ms Harris, as a resident of Jacumba I am completely opposed to the solar project proposed for our small town. The influx of the workers alone is enough to make me oppose this. I've been impacted negatively enough with the building of the border wall monstrosity I see just yards from my home. The solar project will also ruin my view from the front of my home. I moved to Jacumba for its beauty and quiet atmosphere, the natural beauty of nature.

Carriso Gorge Rd and old Historic Hwy 80 will most certainly be negatively impacted with all the extra traffic. I travel Carriso Gorge Rd almost daily and the road is almost always in very bad shape as it is.

I'm very concerned that this project is just bad for Jacumba, I am not opposed to solar power at all but there's surely some location more remote that would be suitable without disrupting a whole town.

Thank you, Nancy R Cordova, Jacumba resident
