RE: JVR Solar Project
proposed for Jacumba
Hot Springs, CA

(Because within
I've been visiting
the area for decades.)

↑ I was shocked to
hear of this proposal planned
for the community due to
its proximity to Anza
Borrego Park and the
famous Carrizo railway.

~~Why are there to put a~~
~~XXXX~~

① Why are you planning an
industrial project in the
heart of a residential
desert community?

② Imperial Valley would be
more appropriate, why not
over

cont.

put the project there?

(3) What impact will this project have on the local families in the community?

(4) What impact will ^{this} project have on the future growth, and what kind of growth?

(5) What pesticides & chemicals will be used and sprayed in the local community and what are the effects on the environment?

(6) What is the life expectancy of this plant?

(7) Where will used & defective panels be disposed of and what are the associated costs?

(8) How will this project benefit Jacumba Hot Springs?

(9) Will this project be forced on the community and if so why?
