

The vision for the Electric Reliability Organization Enterprise, which is comprised of NERC and the six Regional Entities, is a highly reliable and secure North American bulk power system. Our mission is to assure the effective and efficient reduction of risks to the reliability and security of the grid.

RELIABILITY | RESILIENCE | SECURITY

Standards

NERC's **Standards** program ensures the reliability of the bulk power system by developing quality **reliability standards** in a timely manner that are effective, clear, consistent and technically sound.

▶ [Standards News](#)

Electricity ISAC

**E-ISAC** gathers security information, coordinates incident management, and communicates mitigation strategies with stakeholders within the electricity industry, across interdependent sectors, and with government partners.

▶ [E-ISAC](#)

Reliability Assessment & Performance Analysis

The **Reliability Assessment and Performance Analysis** program assesses, measures and investigates historic trends and future projections to improve bulk power system reliability.

Reliability Risk Management

The **Reliability Risk Management** program's goals are to enhance reliability and serve as a learning initiative by providing timely lessons learned from system events, conditions, and trends.

▶ [Lessons Learned](#)

Compliance & Enforcement

The focus of NERC's **Compliance & Enforcement** program is to improve the reliability of the bulk power system in North America by fairly and consistently enforcing compliance with NERC standards.

System Operator Certification and Credential Maintenance Program

**System Operator Certification and Credential Maintenance Program** provides oversight to the policies and processes used to implement and maintain the integrity and independence of the NERC System Operator Certification Program and is responsible for developing and maintaining the Credential Maintenance Program.
