- A new fire threat layer has been posted **here**
- We have added a link to FHSZ PDF maps to the **maps web page** and at the bottom of our home page.

The California Department of Forestry and Fire Protection's Fire and Resource Assessment Program (FRAP) assesses the amount and extent of California's forests and rangelands, analyzes their conditions and identifies alternative management and policy guidelines.

🔗 **ASSESSMENT REPORTS**

Conducted periodically by the CAL FIRE Fire and Resource Assessment Program (FRAP), the Assessment links together state requirements for natural resource inventories and strategies and the federal government's desire to rely more heavily on these state programs in determining priorities for funding. The 2017 Assessment is now complete and is available online.

🔗  **TREE MORTALITY**

Over the past five years, California has experienced an unprecedented drought. One result has been over 100 million dead trees from drought-related causes, including bark beetles.

You can read more about FRAP and CAL FIRE's role in the response to the drought as well as download high hazard zone data from our **Tree Mortality Page**.

🔗  **WILDFIRE HAZARD REAL ESTATE DISCLOSURE (FHSZ)**

FRAP has developed Fire Hazard Severity Zones for community planning and real estate disclosure purposes. There are two types: FHSZ in State Responsibility Areas and Very High FHSZ in Local Responsibility Areas.

FHSZ was originally developed in 2007 and will be updated in the coming year.
