Subject: JVR Energy Park Project - Erosion control & Vegetation Establishment

Good Day Ms. Harris,

My name is Danny Reynaga and I represent Profile Products a manufacture of Hydraulic Applied Erosion Control Products (HECPs) "Hydromulches" that are used for various applications for erosion control and seeding. I was looking for some guidance on specifications as it relates to solar projects within the county and in particular the JVR Energy Park project. I am trying to better understand the requirements or compliance standards that are set for these types of projects. Do they follow Caltrans standards per section 21-2.02D fiber or 21-2.02J Bonded Fiber Matrix or a particular County specification as it relates to soil stabilization. Is there any language available within a specific public document that provides this particular information that is available?

Thank you in advance for your time.

Respectfully,

Danny

Danny Reynaga, CPESC, QSD Western Regional Sales Manager Profile Products LLC. Cell: 760-330-1848
