---

My only comments would be that the Tecate Cypress and European Olive are considered highly flammable. If they irrigate all the trees independent of all other vegetation, I would be ok with these two species.

Dave

Hi Kahler,

The applicant has revised the types of plants they want to provide for the project in response to public comments.

Can you review the attached list and let me know if this list is ok so they can revise their landscape plan?

Let me know if you need a task for it. Also, OT is authorized.

Thanks!

**Nicholas Koutoufidis, MBA**
