---

Hi Nick,

**I wanted you to know that I finally received two abbreviated copies** (cover page and sheets 100-104) **of the revised JVR plan at my house on Thursday, April 22** (only two days after our regular sponsor group meeting was held).

Needless to say, I am disappointed. The missing pages of the plans provide important descriptions about flood fencing, the type of solar panels that will be used, etc. In the interests of transparency, I expected that our sponsor group would receive at least one complete set of the 20-page plans.

Although it appears that the project applicant and PDS want this project fast-tracked, our sponsor group requests that you provide us with a complete printed set of JVR plans at your earliest opportunity as well as some additional time to review it.

Our community deserves a thorough review of the proposed JVR project **before** it can be voted on at our next sponsor group meeting.

Cherry Diefenbach
