Hi Gary,

I don't really have much info to provide on this one because when the project was last submitted for Final Engineering review, an effective review could not be performed (I had only looked at the grading plans, not the drainage study). At that time, there weren't any conditions for the Discretionary action because of concurrent processing. Also, discussions regarding the deviation from the County's acceptable hydrologic methods for the project were still going on between PDS LD and DPW. As such, the discretionary team took the lead on the project. The applicant's engineering team had stated in a meeting that they were not going to be resubmitting for Final Engineering until a Discretionary Permit had been obtained. I do not know where the project stands today. I recommend the team reach out to the discretionary group for insight.

Thanks,

Joshua Bayona, P.E.

Hi,

I assigned the project to Shane Atkins and he'll be working with Salvador Sanchez (Drainage/Stormwater) in final engineering. They'll follow up with you in this week; they are getting up to speed and to follow up with Joshua.

Regards,

Gary Smith, PE, PLS

Hi Nick,

Do you have a draft decision/ site plan for JVR? We need to follow up with Kimly-Horn on a few final engineering questions. This is schedule for 7/9 correct?

-Gary

Hey Gary,

It's my understanding that Joshua Bayona is no longer with the PDF LD department and you would be the new contact regarding JVR Solar grading comments. I was reaching out to see if you have any time this week to jump on a quick call regarding some of the grading comments on JVR. Let me know. Thanks!

Best Regards,
Tanya
