I Jan S Minn,

I don't want Solar Panels because or water (ground) will be poisoned and that is going to be the worst thing for our town. The pesticides will blow in the winds why not put this in the Imperial Valley. To many trucks destroys the peace & roads are blocked, noise pollution we like are peace. This is a agriculture land, why aren't you preserve the land for agriculture. We people want more of our town a scenic Hwy, The Panels will block to view we have a airport and this is a danger to the glider plans. We don't want chain link fence in our town that change our trials, we want our old dain, Not harrow down. We don't want a second stick station. What about the temperature in the area will raise, we don't want the temp. rise

We want a Bigger buffer
on the East side of the South side
We own School to open, we need
more Houses & more people not
a industrial park
