ATTN: SUSAN HARRIS

We, the undersigned, oppose the 90MW Jacumba Valley Ranch (JVR) Solar Park. This industrial-sized project seeks to put

300,000 photo-voltaic cells on 643 acres immediately adjacent to Jacumba residences, the senior center and community park, the Jacumba airport, and along both sides of historic Highway 80. If approved, this project would destroy scenic vistas, lower our property values, displace wildlife, and introduce mechanical noise into our quiet, rural landscape. More importantly, the JVR solar park squanders Jacumba's ability to expand by consuming the best available land for at least the next 38 years. (Left is a visual simulation of the JVR Park.)

As a resident of Jacumba, I want our elected leaders to vote for the NO PROJECT alternative of the October 2020 JVR DEIR!  
Please help us save our town!
