Subject: JVR Energy Park
Date: Monday, October 12, 2020 12:29:25 PM

I am writing to express my concerns about the proposed JVR Energy Park to be considered in the community of Jacumba . We strongly oppose this and all industrial size solar and wind projects that may be considered in our small rural area.

I2-1

They will be not in our communities best interest. They will not create jobs and they will be an eyesore, they will alter our beautiful rural landscapes. Large industrial scale projects that are out of line with our environment. They are ugly and obstruct our views. They will rip and destroy our land and use our water to build them.

I2-2

As a reminder; Our power is regularly shut off during peak winds and bad weather conditions. The very power that these solar panels create is transmitted to San Diego/Los Angeles through our community during these times although WE are without power. (How is this rational at all?)This in itself is enough to frustrate and upset us and our neighbors. Please consider installing large scale solar and wind projects in

I2-3

the areas and cities that are actually benefiting from them. Don't dump on our small town. We here in Boulevard, Jacumba and Campo are tired of being used as a dumping ground for pedophiles and industrial energy projects that NO ONE ELSE wants!
